Dangerous Call:

Mastering Ethereum Andreas M. Antonopoulos, Gavin Wood Ph.D., 2018-11-13 Ethereum represents the gateway to a worldwide decentralized computing paradigm This platform enables you to run decentralized applications DApps and smart contracts that have no central points of failure or control integrate with a payment network and operate on an open blockchain With this practical guide Andreas M Antonopoulos and Gavin Wood provide everything you need to know about building smart contracts and DApps on Ethereum and other virtual machine blockchains Discover why IBM Microsoft NASDAQ and hundreds of other organizations are experimenting with Ethereum This essential guide shows you how to develop the skills necessary to be an innovator in this growing and exciting new industry Run an Ethereum client create and transmit basic transactions and program smart contracts Learn the essentials of public key cryptography hashes and digital signatures Understand how wallets hold digital keys that control funds and smart contracts Interact with Ethereum clients programmatically using JavaScript libraries and Remote Procedure Call interfaces Learn security best practices design patterns and anti patterns with real world examples Create tokens that represent assets shares votes or access control rights Build decentralized applications using multiple peer to peer P2P components

Healing PTSD and Trauma: A Field Manual for Restoring Safety, Rhythm, and Sovereignty Laing Z. Matthews, 2025-12-30 Healing PTSD and Trauma is a practical field manual for people who are tired of being ruled by alarm It is written for readers who can function on the outside but cannot rest on the inside those who look fine work parent and keep going yet live with hypervigilance sudden spikes nightmares shutdown dissociation avoidance and the constant sense that safety never fully arrives This book treats trauma symptoms without shame Your nervous system is not broken It learned to survive The problem is that survival mode is expensive It steals sleep attention relationships and joy The goal here is not to analyze your past until you feel better The goal is to restore safety rhythm and sovereignty so the system can do what it was designed to do return to order when interference is removed and daily life becomes predictable again The structure is simple and ruthless in the best way First you get a clear map of trauma the difference between single incident PTSD and complex trauma shock trauma and developmental trauma why some people look fine but feel unsafe and the myths that keep people stuck Then you learn the biology of alarm why the threat system learns fast and forgets slow why attention gets hijacked why the body reacts before the mind understands and how the trauma loop reinforces itself through cues stories coping and temporary relief Next comes first aid A 24 72 hour stabilization protocol shows exactly what to do in a spike grounding through the senses posture and weight slow exhale without forcing temperature reset and water methods simple movement to discharge adrenaline and sleep rescue for the next one to three nights You also get clear do not rules for spikes doom scrolling arguing alcohol stimulants intense breathwork dramatic rituals and anything that turns distress into escalation From there the book moves into a 30 90 day rebuild plan It treats sleep as the first gate of recovery and gives practical sleep protection rules for hypervigilance night

sweats nightmares and the fear of falling asleep It stabilizes blood sugar so panic is not being fed by physiological swings It rebuilds the body through gentle strength mobility and walking using movement as a trauma medicine and a sovereignty practice It teaches emotion without flooding with containment tools dose control and the two percent rule tiny safe exposure over heroic pushes Exposure is handled with precision You learn how to build an exposure ladder that expands your life without breaking you how to tell if exposure is helping or harming and what to do after exposure so your nervous system learns safety Memory and meaning come later not first This manual shows when to tell the story and when not to how to separate facts from trauma interpretations and how to repair self blame and moral injury without forcing forgiveness or fake reconciliation For readers drawn to spiritual language the book includes a careful section on the inner healer and the primordial spirit as innate coherence not fantasy It offers simple rituals that stabilize without obsession and strict discernment rules that prevent paranoia superstition and compulsive spiritual coping A skeptic test page translates ritual into psychology and physiology so results still count even if your explanation differs You also get practical scripts for relationships and work red flags for high risk states guidance on using therapy and medication without shame metrics that matter relapse prevention case examples and ready to use appendices a seven day reset a crisis checklist an exposure ladder template boundaries scripts international support guidance and a two minute daily governance practice to bring the rightful ruler back to the throne It is a book of order Reduce interference Rebuild rhythm Restore choice Let the system heal itself

Social-Behavioral Modeling for Complex Systems Paul K. Davis, Angela O'Mahony, Jonathan Pfautz, 2019-04-09 This volume describes frontiers in social behavioral modeling for contexts as diverse as national security health and on line social gaming Recent scientific and technological advances have created exciting opportunities for such improvements However the book also identifies crucial scientific ethical and cultural challenges to be met if social behavioral modeling is to achieve its potential Doing so will require new methods data sources and technology The volume discusses these including those needed to achieve and maintain high standards of ethics and privacy The result should be a new generation of modeling that will advance science and separately aid decision making on major social and security related subjects despite the myriad uncertainties and complexities of social phenomena Intended to be relatively comprehensive in scope the volume balances theory driven data driven and hybrid approaches The latter may be rapidly iterative as when artificial intelligence methods are coupled with theory driven insights to build models that are sound comprehensible and usable in new situations With the intent of being a milestone document that sketches a research agenda for the next decade the volume draws on the wisdom ideas and suggestions of many noted researchers who draw in turn from anthropology communications complexity science computer science defense planning economics engineering health systems medicine neuroscience physics political science psychology public policy and sociology In brief the volume discusses Cutting edge challenges and opportunities in modeling for social and behavioral science Special requirements for achieving high standards of privacy and ethics New approaches

for developing theory while exploiting both empirical and computational data Issues of reproducibility communication explanation and validation Special requirements for models intended to inform decision making about complex social systems

Policing & Firearms Clare Farmer, Richard Evans, 2022-10-31 Policing and firearms it is a crucial relationship Should police be routinely armed If so what restrictions should be imposed on the use of firearms Where police are not routinely armed there is still a need for specialist armed police how do these units operate and are they effective This ground breaking edited book explores the nexus between policing and firearms with a genuinely international focus Contributors from Ireland Germany the United Kingdom Brazil Mexico the United States Venezuela New Zealand Australia and Canada explore the issues from a range of perspectives including human rights militarization police legitimacy and the risks police firearms pose to the community and to police themselves This thought provoking collection is an indispensable resource for law

enforcement policymakers and students of policing and criminal justice Hoyle's Games Modernized - Cards, Board Games and Billiards Lawrence H. Dawson, 2013-04-16 Originally published in London in the 1920s as a revised and enlarged edition based on Hoyle's early works of the 1700s The book is an illustrated compendium of over eighty games and their varieties including card billiard and board games These are fully explained with rules and advice on play Many of the earliest books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive Home Farm Books are republishing these classic works in affordable high quality modern editions using the original text and artwork
