books in the English language *Death and the City in Premodern Europe* Martin Christ, Carmen González Gutiérrez, 2024-10-18 Through a range of case studies this book traces how death shaped cities and vice versa It argues that by focusing on death and the city we can open up new avenues of research into religious political and cultural change Dying in a city was significantly different from dying in a village or the countryside Cities and towns were centres of commerce and learning shaping discourses on death The importance of urban centres meant that events had a large audience there for example when people were executed Urban diversity led to a wide variety of deathways which also had to be regulated by urban magistrates The placement of dead bodies and the urban arrangement of cemeteries were related to the high population density in towns urban hygiene and religious changes such as the Reformation The fact that many cities were seats of power had a direct impact on the design of necropolises and the performance of funerary rituals It was also in urban centres that religious ethnic and cultural diversity tended to be more pronounced leading to compromise and conflict when it came to burials and commemoration Considering death and the city can therefore help us understand much broader processes of dying urbanity and change over time This book is essential reading for all students and academics of death in the premodern period The chapters in this book were originally published as a special issue of *Mortality*

Introduction to the Old Testament as Scripture Brevard S. Childs, 1979 This Introduction attempts to offer a different model for the discipline from that currently represented It seeks to describe the form and function of the Hebrew Bible in its role as sacred scripture for Israel It argues the case that the biblical literature has not been correctly understood or interpreted because its role as religious literature has not been correctly assessed *Citifying Jesus* Emiliano Rubens Urciuoli , 2024-09-02 Urban religion is not the generic term for any religion existing within an urban environment Emiliano Rubens Urciuoli demonstrates that examining early Christianity as an urban religion involves understanding that certain fundamental attributes usually seen as inherent to this religion can be better explained as outcomes of particular urban conditions and distinct uses of urban space in other words as urban effects Discussions on Philosophy and Literature,
