Sample Book Insights 1 The best way to learn about wild plants is to take the time to study them together with an expert This process takes a long time but you will learn the most in the safest way possible 2 The best way to learn about wild edible and medicinal plants is to spend time doing research in a well stocked library Do not rely solely on the Internet for your information as quality control is nonexistent and mistakes can be fatal 3 I like to play fast and loose with certain things but with others I force myself to go slow and work the right way I prefer to gather five or more informational resources and vet them together before trusting my life to a piece of information 4 The Universal Edibility Test is supposed to allow a person to determine if they can safely eat a wild plant but many plants are extremely toxic and even a small amount will result in death
