

# What is ecosystem stability?

- The vast majority of natural ecosystems experience regular environmental change, or disturbances.
- Most ecologists describe **ecosystem stability** as the ability of an ecosystem to maintain its structure and function over long periods of time and despite disturbances.
- **Ecosystem structure** includes physical and geological structures of the landscape, the number and diversity of species present, the population sizes of those species, and the ways in which these populations interact.
- **Ecosystem function** refers to processes such as water and nutrient cycling and biomass productivity that the ecosystem provides.
