HIV, Sex and Sexuality in Later Life Mark Henrickson, Casey Charles, Shiv Ganesh, Sulaimon Giwa, Kan Diana Kwok, Tetyana Semigina, 2024-05-21 Drawing on international perspectives and research this book explores the experiences of sex and sexuality in individuals and groups living with HIV in later life 50 **Bulletin on Narcotics**, 1952 The Literary Digest Edward Jewitt Wheeler, Isaac Kaufman Funk, William Seaver Woods, Arthur Stimson Draper, Wilfred John Funk, 1922 Stand Your Ground Douglas Brown, Kelly, 2015-05-05 The 2012 killing of Trayvon Martin an African American teenager in Florida and the subsequent acquittal of his killer brought public attention to controversial Stand Your Ground laws The verdict as much as the killing sent shock waves through the African American community recalling a history of similar deaths and the long struggle for justice On the Sunday morning following the verdict black preachers around the country addressed the question Where is the justice of God What are we to hope for This book is an attempt to take seriously social and theological questions raised by this and similar stories and to answer black church people's questions of justice and faith in response to the call of God But Kelly Brown Douglas also brings another significant interpretative lens to this text that of a mother There has been no story in the news that has troubled me more than that of Trayvon Martin's slaying President Obama said that if he had a son his son would look like Trayvon I do have a son and he does look like Trayvon Her book will also affirm the truth of a black mother's faith in these times of stand your ground **Metaphors of ANGER**

across Languages: Universality and Variation Zoltan Kövecses, Réka Benczes, Veronika Széldi, 2024-11-04 Anger is one of the basic emotions of human emotional experience informing and guiding many of our choices and actions Although it has received considerable scholarly attention in a number of disciplines including linguistics a basic question has still remained unresolved why do variations in the folk model of anger exist across languages if it is indeed a basic emotion rooted in largely universal bodily experience By drawing on a wide selection of comparable linguistic data from dozens of languages including a number of less researched languages this volume provides the most comprehensive account of what is universal and what is variable in the folk model of anger and why It also investigates the role that metonymies might play in the emergence of anger related metaphors and in what ways context influences or shapes anger metaphors and thereby the resulting folk model of anger No such volume exists in the cognitive linguistic literature on anger or on emotions for that matter The book is thus an essential contribution to the study of anger and will serve as basic reading for any researcher interested in how the conceptualization of anger is constructed via the interplay of bodily experience language and the larger cultural context

Chamber Music Roger Kuin, 1998-01-01 Roger Kuin's *Chamber Music* is a playfully written imaginative and ultimately demanding book with a critical approach characterized by an unusual and idiosyncratic post modern critical style that will challenge the reader's perceptions of what a book of criticism should and can do Analysing the sonnet sequences of Sidney Spenser and Shakespeare both from an interpretive angle and from the perspective of a post modern re evaluation of the

Renaissance sonnets Roger Kuin's discussion is influenced by many modern literary critics including Roland Barthes and Umberto Eco. Kuin focuses on the problems inherent in the form of the sonnet sequence, emphasizing the various forms of indeterminacy central to their meaning. His sense of the intertextual relationship among the major English sequences is subtle and in places strikingly original, in combination with a highly sophisticated understanding of theory. Chamber Music is a book that will infuriate many but ultimately reward those who flow with its idiosyncratic style towards Roger Kuin's admirable and expert conclusions.

Criminal Law David Brody, James Acker, 2010 The highly anticipated Second Edition of Criminal Law introduces students to the underlying principles, legal doctrine, and rules regarding crimes, defenses, and punishment in substantive criminal law. Innovative in its case study approach, this thoroughly updated revision will help students develop analytical skills while learning the content and context of substantive criminal law. Now with a more student-friendly format, this text guides students through theory and practice using a blend of old and new materials to foster understanding of what the law is, how it evolved, the principles on which it is based, and how it applies to various circumstances.

Law by Night Jonathan Goldberg-Hiller, 2023-11-28 In *Law by Night*, Jonathan Goldberg-Hiller asks what we can learn about modern law and its authority by understanding how it operates in the dark of night. He outlines how the social experience and cultural meanings of night promote racialized and gender violence but also make possible freedom of movement for marginalized groups that might be otherwise unavailable during the day. Examining nighttime racial violence, curfews, gun ownership, the right to sleep, and take-back-the-night rallies, Goldberg-Hiller demonstrates that liberal legal doctrine lacks a theory of the night that accounts for a nocturnal politics that has historically allowed violence to persist. By locating the law's nocturnal limits, Goldberg-Hiller enriches understandings of how the law reinforces hierarchies of race and gender and foregrounds the night's potential to enliven a more egalitarian social life.

Failure Analysis and Risk Assessment of Natural Disasters Through Machine Learning and Numerical Simulation, volume IV Faming Huang, Peng Zeng, Sansar Raj Meena, Jiawei Xie, 2025-08-26 Natural disasters which include landslides, rock falls, rainstorms, floods, and earthquakes appear as results of the progressive or extreme evolution of climatic, tectonic, and geomorphological processes and human engineering activities. It is significant to explore the failure mechanism and carry out spatial modeling of these natural disasters due to their serious harm to the safety of people's lives and property. Various

advanced methods including successful remote sensing geographic information systems machine learning models and numerical simulation techniques are promising tools to analyze these complex disasters Machine Learning models such as neuro fuzzy logic decision trees artificial neural networks deep learning and evolutionary algorithms are characterized by their abilities to produce knowledge and discover hidden and unknown patterns and trends from large databases whereas remote sensing and Geographic Information Systems appear as significant technology equipped with tools for data manipulation and advanced mathematical modeling What is more numerical simulation can also be acknowledged as an advanced technology for discovering hidden failure mechanisms of disasters
