Daniel Schlier:

The National Corporation Reporter ,1897 **Biblical Theology** Prof. Leo Perdue,2010-10-01 One of the thorniest problems in theological study is the relationship between biblical studies on the one hand and constructive theology on the other Theologians know that the Bible is the core source document for theological construction and hence that they must be in conversation with the best in critical study of Scripture For many biblical scholars the point of what they do is to help the biblical text speak to today s church and world and hence they would do well to be in conversation with contemporary theology Yet too often the two groups fail to engage each other s work in significant and productive ways The purpose of the Library of Biblical Theology and this introductory volume to it is to bring the worlds of biblical scholarship and constructive theology together It will do so by reviving biblical theology as a discipline that describes the faith of the biblical periods on the one hand and on the other hand articulates normative understandings of modern faith and practice In this volume the authors begin by providing an overview of the history and possible future of biblical theology They introduce biblical theology as a fundamentally contrastive discipline one that is neither dogmatic theology seeking to explain the official teachings of a particular Christian tradition nor is it a purely historical approach to Scripture eschewing questions of the Bible s contemporary message and meaning Rather biblical theology takes seriously both the need to understand the message of Scripture in its particular historical context and the need to address that message to questions that confront contemporary human life Routledge Handbook of Humanitarian Communication Lilie Chouliaraki,Anne Vestergaard,2021-09-30 The Routledge Handbook of Humanitarian Communication is an authoritative and comprehensive guide to research in the academic sub field of humanitarian communication It is broadly focused on communication that presents human vulnerability as a cause for public concern and encompasses communication with respect to humanitarian aid and development as well as human rights and humanitarian wars Recent years have seen the expansion of critical scholarship on humanitarian communication across a range of academic fields sharing recognition of the centrality of media and communications to our understanding of humanitarianism as an agent of transnational power global governance and cosmopolitan solidarity The Handbook brings into dialogue these diverse fields their theoretical frameworks and methodological approaches as well as the public debates that lie at the heart of the contemporary politics of humanitarianism It consolidates existing knowledge and maps out this emerging field as an important site of interdisciplinary knowledge production on media communication and humanitarianism As such the Handbook is not simply a collection of texts sharing a similar theme It is a coherent intellectual contribution which systematizes current critical scholarship in terms of Domains Methods and Issues and sets an agenda of emerging and evolving research priorities in the field Consisting of 26 chapters written by international scholars who have contributed to laying the foundation of the field this volume provides an essential guide to the key ideas issues concepts and debates of humanitarian communication Annual Report of the Adjutant-General of the State of New York for
