the end of each chapter so that the students can independently solve them and test their understanding of the concepts and computations introduced in the chapter Outcome At the end students will be able to describe what a spreadsheet is and what Excel s capabilities are and can work with elements that make up the structure of a worksheet They will be able to work with spreadsheets and enter data in Excel use formulae and calculations and create tables charts and pivot tables They will be familiar with basic statistical and financial measures of general use They will be able to do basic computations in statistics and finance in Excel Students will acquire the capacity to create personal and or business spreadsheets following current professional and or industry standards Their potential for critical thinking to design and create spreadsheets and communicate in a business setting using spreadsheet vocabulary will be enhanced The educational background required for the student to understand the text is some basic English and Mathematics of school leaving level Some fl air for numbers will be an asset and for them it will be a breeze others will have to make an effort but ample illustrations and practice questions make life simple whether it is basic statistics or slightly intricate finance

[An Introduction to Statistics using Microsoft Excel 2nd Edition](#) Dan Remenyi,George Onofrei,Joseph English,2015-05-26 The handling of numbers in arithmetic and the progression into the more abstract field of mathematics and statistics is generally approached poorly in our education system The inadequacy is not necessarily in the teaching techniques or the books and other text used but rather in the attitude towards these subjects These subjects are seen as something which has to be taught because it is part of a preordained curriculum rather than a set of tools which are available to help people live a fuller more productive and more interesting life It is so enlightening when one hears people say I thought that when I left school I was leaving all the maths stuff behind me or I was bored witless by all those numbers and formulas sic that were forced down my throat This book was written out of a frustration at seeing statistics taught through formal methods using large scale statistic software packages It seemed to me that very little was learned by this process and quite often both the teachers and the students were in denial It is true that the students were generally able to pick up enough knowledge to pass an examination or to complete a piece of research But I seldom saw anything which could be regarded as deep learning and the little which had been learned did not stay for any length of time in the heads of these learners I know people who have passed several university level courses in statistics and they can hardly recall never mind use any of what was taught to them

Data Analysis and Decision Making with Microsoft Excel S. Christian Albright,Wayne L. Winston,Christopher James Zappe,1999 In response to the growing market trend in quantitative education Albright Winston and Zappe s integrated business statistics and management science text presents core statistics and management science methods in a modern unified spreadsheet oriented approach With a focus on analyzing not on techniques the book covers business statistics with some essential managerial science topics included The example based Excel spreadsheet approach is useful in courses that combine traditional statistics and management science topics though can be easily used for a one term business statistics only course The modeling and application focus

together with the Excel spreadsheet add ins provides a complete learning source for both students and practicing managers
