Database Machines and Database Management Esen Ozkarahan,1986 **Database Machines** A. K. Sood,A. H. Qureshi,2013-11-09 This volume consists of a collection of 28 papers presented at the NATO Advanced Study Institute held July 14 27 1985 in the beautiful resort at Les Arcs France The director of this ASI was A K Sood and A H Qureshi was the co director Since its introduction in the early 1970s the relational data model has been widely accepted Several research and industrial efforts are being undertaken to develop special purpose database machines to implement the relational model In addition database machines are being explored for applications such as image processing and information retrieval In this NATO ASI the lecturers discussed special purpose database machine architectures from the viewpoint of architecture and hardware detail software user needs theoretical framework and applications The papers presented were of two types regular papers and short papers The research in database machines is being conducted in several countries This fact is under scored when it is noted that papers in this volume are authored by researchers in France Germany Italy Japan Portugal Turkey U K and U S A The first paper discusses the experience and applications of users with a commercially available database machine In the following eight papers the characteristics of six database machines are discussed The second third and fourth papers deal with the RDBM project at the Technical University of Braunschweig Germany Zeidler discusses the design objectives architecture and system design of RDBM Teich presents the hardware utilized for sorting **Database Machines and Knowledge Base Machines** Masaru Kitsuregawa,Hidehiko Tanaka,2012-12-06 This volume contains the papers presented at the Fifth International Workshop on Database Machines The papers cover a wide spectrum of topics on Database Machines and Knowledge Base Machines Reports of major projects ECRC MCC and ICOT are included Topics on DBM cover new database machine architectures based on vector processing and hypercube parallel processing VLSI oriented architecture filter processor sorting machine concurrency control mechanism for DBM main memory database interconnection network for DBM and performance evaluation In this workshop much more attention was given to knowledge base management as compared to the previous four workshops Many papers discuss deductive database processing Architectures for semantic network prolog and production system were also proposed We would like to express our deep thanks to all those who contributed to the success of the workshop We would also like to express our appreciation for the valuable suggestions given to us by Prof D K Hsiao Prof D Database Machines H.-O. Leilich,M. Missikoff,2012-12-06 The International Workshop on Database Machines in Munich is the third of its kind preceeded by the meetings in Florence Sept 81 and San Diego Sept 82 The workshop is aimed at providing an interchange of ideas and experience on computer systems designed to perform database operations more efficiently than general purpose computers with a software database management system Many proposals have been published during the past 10 years but now several systems have been built and practically implemented and some are even commercially available so that confrontation with the real world is starting to

occur The kinds of question which arise during this phase of coming to maturity are those involved with evaluation and measurement The emphasis of the workshop is therefore on performance evaluation and the respective modelling techniques and methodology Data flow and other new topics including algorithms are also treated with respect to performance and efficiency We are glad to be able to include some papers on existing commercial products from both the designer and the user viewpoints We hope to encourage critical comments in this field and have arranged a session with the title Where Database Machines Are Going to be followed by a panel discussion

Database Machines Haran Boral, Pascal Faudemay, 1989 This volume contains 24 papers presented at the Sixth International Workshop on Database Machines The papers cover a wide spectrum of topics including system architectures storage structures associative memory architectures memory resident systems deduction and retrospectives on maturing projects The nature of the papers is highly technical and presumes knowledge of database management systems and familiarity with database machines The book is representative of the dual trend in the field towards 1 search for new functionality and 2 attention to detail completeness and performance of prototype implementations

Future Database Machine Architectures David K. Hsiao, 1984 There are many software database management systems available on many general purpose computers ranging from micros to super mainframes Database machines as backended computers can offload the database management work from the mainframe so that we can retain the

same mainframe longer However the database backend must also demonstrate lower cost higher performance and newer functionality Some of the fundamental architecture issues in the design of high performance and great capacity database machines are addressed Solutions towards resolving these design issues are articulated This article is written for the New York University s Symposium in New Directions of Database Systems on the basis of a lecture given at Microelectronic and Computer Technology Inc MCC

Database Machine Performance: Modeling Methodologies and Evaluation Strategies Francesca Cesarini, Silvio Salza, 1987-06-24 This book is focused on the performance evaluation of database machines i e special purpose architectures specifically meant to improve the efficiency of database applications The topic is of primary interest because of the need to compare these systems among themselves and with traditional database management systems The book gathers the experience of several European research groups in modeling and analyzing the database machine architectures they have proposed It deals both with the main methodological issues and with the detailed analysis of some relevant problems It also includes an extensive annotated bibliography with more than one hundred references and several keys for the access to the literature
