David Levy's Guide to Observing and Discovering Comets David H. Levy, 2003-05-15 David Levy has held a lifelong passion for comets and is one of the most successful comet discoverers in history In this book he describes the observing techniques that have been developed over the years from visual observations and searching to photography through to electronic charge coupled devices CCDs He combines the history of comet hunting with the latest techniques showing how our understanding of comets has evolved over time This practical handbook is suitable for amateur astronomers from those who are casually interested in comets and how to observe them to those who want to begin and expand an observing program of their own Drawing widely from his own extensive experience Levy describes how enthusiastic amateurs can observe comets and try to make new discoveries themselves David H Levy is one of the world's foremost amateur astronomers He has discovered seventeen comets seven using a telescope in his own backyard and had a minor planet Asteroid 3673 Levy named in his honor He is best known as the co discoverer of the famous 1994 Shoemaker Levy 9 comet Levy is frequently interviewed in the media and succeeded Carl Sagan as science columnist for Parade magazine He has written and contributed to a number of books most recently *David Levy's Guide to the Night Sky* Cambridge 2001 **David**

Levy's Guide to Observing Meteor Showers David H. Levy, 2008 Meteors occur when a meteoroid a speck of dust in space enters the Earth's atmosphere The heat generated when this happens causes the surrounding air to glow resulting in shooting stars During the most spectacular meteor storms larger particles give rise to fireballs and firework like displays Meteors are a delightful observing field they do not require a telescope and they can be seen on any clear night of the year even in bright twilight It was the sight of a single meteor that inspired David Levy to go into astronomy and in this book he encourages readers to go outside and witness these wonderful events for themselves This book is a step by step guide to observing meteors and meteor showers Any necessary science is explained simply and in clearly understandable terms This is a perfect introduction to observing meteors and is ideal for both seasoned and budding astronomers [Asteroids and Dwarf Planets and How to Observe Them](#) Roger Dymock, 2010-11-01 Dwarf planets which were formerly called asteroids except for the planet Pluto and the smaller Solar System bodies still called asteroids today are making front page news particularly those that are newly discovered and those that might present a hazard to life on Earth by impacting our planet In this age of giant telescopes and space probes these small Solar System bodies have advanced from being tiny points of light to bodies worthy of widespread study This book describes the dwarf planets and asteroids themselves their origins orbits and composition and at how amateur astronomers can play a part in their detection tracking and imaging The book is divided into two parts Part I describes physical properties including taxonomic types of dwarf planets and asteroids how they formed in the early life of the Solar System and how they evolved to their present positions groups and families It also covers the properties used to define these small Solar System bodies magnitude rotation rates described by their light curves and

orbital characteristics Part II opens with a description of the hardware and software an amateur or practical astronomer needs to observe and also to image asteroids Then numerous observing techniques are covered in depth Finally there are lists of relevant amateur and professional organizations and how to submit your own observations to them *Handbook of Practical Astronomy* Günter D. Roth,2009-06-18 The Compendium of Practical Astronomy is unique The practical astronomer whether student novice or accomplished amateur will find this handbook the most comprehensive up to date and detailed single guide to the subject available It is based on Roth's celebrated German language handbook for amateur astronomers which first appeared over 40 years ago **Dispatches from Planet 3** Marcia Bartusiak,2018-09-18 An award winning science writer presents a captivating collection of cosmological essays for the armchair astronomer The galaxy the multiverse and the history of astronomy are explored in this engaging compilation of cosmological tales by multiple award winning science writer Marcia Bartusiak In thirty two concise and engrossing essays the author provides a deeper understanding of the nature of the universe and those who strive to uncover its mysteries Bartusiak shares the back stories for many momentous astronomical discoveries including the contributions of such pioneers as Beatrice Tinsley with her groundbreaking research in galactic evolution and Jocelyn Bell Burnell the scientist who first discovered radio pulsars An endlessly fascinating collection that you can dip into in any order these pieces will transport you to ancient Mars when water flowed freely across its surface to the collision of two black holes a cosmological event that released fifty times more energy than was radiating from every star in the universe and to the beginning of time itself *The Observer's Handbook* ,2012

Hunting and Imaging Comets Martin Mobberley,2010-10-08 For many astronomers the holy grail of observation is to discover a comet not least because comets always bear the name of their discoverer *Hunting and Imaging Comets* was written for comet hunters and digital imagers who want to discover rediscover monitor and make pictures of comets using astronomical CCD cameras and DSLRs The old days of the purely visual comet hunter are pretty much over but this is not to say that amateurs have lost interest in finding comets The book also covers the discovery of comet fragments in the SOHO image data CCD monitoring of older comets prone to violent outbursts the imaging of new NEOs Near Earth Objects that have quite often been revealed as comets not asteroids by amateur astronomers and the finding of recent comets impacting Jupiter **Every Soul a Star** Wendy Mass,2008-10-01 And as streams of light fan out behind the darkened sun like the wings of a butterfly I realize that I never saw real beauty until now At Moon Shadow an isolated campground thousands have gathered to catch a glimpse of a rare and extraordinary total eclipse of the sun It's also where three lives are about to be changed forever Ally likes the simple things in life labyrinths star gazing and comet hunting Her home the Moon Shadow campground is a part of who she is and she refuses to imagine it any other way Popular and gorgeous everybody says so Bree is a future homecoming queen for sure Bree wears her beauty like a suit of armor But what is she trying to hide Overweight and awkward Jack is used to spending a lot of time alone But when opportunity knocks he finds himself in situations he never
