Teaching Mathematics with Classroom Voting Kelly Slater Cline,Holly Zullo,2012 Are you looking for new ways to engage your students Classroom voting can be a powerful way to enliven your classroom by requiring all students to consider a question discuss it with their peers and vote on the answer during class When used in the right way students engage more deeply with the material and have fun in the process while you get valuable feedback when you see how they voted But what are the best strategies to integrate voting into your lesson plans How do you teach the full curriculum while including these voting events How do you find the right questions for your students This collection includes papers from faculty at

institutions across the country teaching a broad range of courses with classroom voting including college algebra precalculus calculus statistics linear algebra differential equations and beyond These faculty share their experiences and explain how they have used classroom voting to engage students to provoke discussions and to improve how they teach mathematics This volume should be of interest to anyone who wants to begin using classroom voting as well as people who are already using it but would like to know what others are doing While the authors are primarily college level faculty many of the papers could also be of interest to high school mathematics teachers Publisher description
