## **Arms Control Theory And Practice:**

**Arms Control** Michael J. Sheehan, 1988-01-01      Conventional Arms Control Theory and Practice Gary B. Brown, Army War College (U.S.), 2004 Conventional arms control theory and practice matured during the prolonged period of the Cold War. Treaties and agreements mandated inspections and the institutions that managed them became and remain almost routine and entrenched. However, the end of the Cold War has resulted in a limited re-evaluation of arms control objectives, processes, and institutions. Many agreements were based on East-West or NATO-Warsaw Pact divisions. Since the Warsaw Pact no longer exists and Cold War era tensions between East and West are markedly reduced, several questions concerning existing arms control agreements arise: Does arms control serve the same purpose today as it did during the Cold War? What measures of effectiveness should be applied to arms control in the post-Cold War and the post-9/11 era? How does arms control help serve United States security interests in the current world order? Assuming the United States wants to continue conventional arms control in the post-Cold War and post-9/11 world, where should the United States policy go? To answer these questions, an examination of United States policies regarding large numbers of conventional armaments, both in necessary standing forces and those in excess of a nation's requirements, stockpiles of aging and excess munitions, the control and management of stockpiles of Small Arms and Light Weapons (SALW), and existing arms control agreements and treaties must be accomplished. This paper will examine arms control history and current initiatives in order to argue that arms control is still valid in the post-Cold War era and make recommendations on where U.S. policy should go. Unconventional and strategic weapons and their respective treaties or agreements, i.e., Biological Weapons Convention (BWC), Chemical Weapons Convention (CWC), and Nuclear Weapons, are not considered in this review.      *The Theory and Practice of Arms Control* Adam Roberts, 1988      **The Arms Control Experience Re-examined : Arms Control in Theory and Practice 1958-1981** Queen's University (Kingston, Ont.). Centre for International Relations, Robin Ranger, 1981      **Reconceptualising Arms Control** Neil Cooper, David Mutimer, 2014-01-02 The theory and practice of arms control seemed to have its heyday during the height of the Cold War with its focus on the East-West conflict and nuclear arms. In the past twenty years, both arms technologies and various practices aimed at their control have continued to develop, but scholarly thinking has not kept up. This volume seeks to redress this scholarly neglect of the range of issues associated with the control of the means of violence by asking the question: what does arms control mean in the 21st Century? In asking this question, the volume examines issues surrounding sovereignty, geopolitics, nuclear disarmament, securitization of space, technological developments, human rights, the clearance of landmines, the regulation of small arms, and the control of the black market for arms and nuclear secrets. The book discusses terrorism with reference to the case of the suicide attacks in Beirut in 1983 and how the Obama administration is orientating its posture on nuclear arms. This book was published as a special issue of *Contemporary Security Policy*.      **The Oxford Handbook of Peaceful Change in International Relations** T. V. Paul, Deborah Welch Larson, Harold A.

Trinkunas, Anders Wivel, Ralf Emmers, 2021-08-05 This work provides a thorough examination of research on the problem of change in the international arena and the reasons why change happens peacefully at times and at others violently It contains over forty chapters which examine the historical theoretical global regional and national foreign policy dimensions of peaceful change As the world enters a new round of power transition conflict involving a rapidly rising China and a relatively declining United States this Handbook provides a necessary resource for decisionmakers and scholars engaged in this vital area of research

### **Communitarian International Relations**

Emanuel Adler,2004-11-10 In Emanuel Adler s distinctive constructivist approach to international relations theory international practices evolve in tandem with collective knowledge of the material and social worlds This book comprising a fresh selection of his journal publications a substantial new introduction three previously unpublished articles points IR constructivism in a novel direction characterized as communitarian Adler s synthesis does not herald the end of the nation state nor does it suggest that agency is unimportant in international life Rather it argues that what mediates between individual and state agency and social structures are communities of practice which are the wellspring and repositories of collective meanings and social practices The concept of communities of practice casts new light on epistemic communities and security communities helping to explain why certain ideas congeal into human practices and others do not and which social mechanisms can facilitate the emergence of normatively better communities

### **Arms Control in the 21st Century**

Oliver Meier,Christopher Daase,2013-05-02 This volume evaluates the impact of coercive arms control efforts to curb the spread of weapons of mass destruction in the twenty first century A new paradigm in arms control is gradually replacing the idea that mutually agreed restrictions on armaments can improve international security Thus Hedley Bull s classic definition of arms control as the cooperation between antagonistic pairs of states in military affairs needs to be amended by a new notion of coercive arms control as the set of non cooperative and non reciprocal measures to restrict the weapons or military capabilities of certain states This volume addresses the topic of how this ongoing paradigmatic shift will affect the effectiveness of arms control as a conflict management instrument While some argue that new instruments can complement and strengthen traditional multilateral and inclusive arms control regimes others maintain that conflicts and contradictions between coercive and cooperative arms control regimes will severely limit their effectiveness This volume provides a forum for academics and practitioners from around the globe to discuss these developments in depth and to assess the specific strengths and weaknesses of these new instruments of arms control This book will be of much interest to students of arms control global governance foreign policy and IR Security Studies in general

### **Stanford journal of international studies**

,1979 **House of Cards** Colin S. Gray,1992 If peace breaks out can arms control be far behind According to Colin S Gray this sardonic motto describes events of the 1990s just as well as it did those of the 1920s Gray offers a provocative history of twentieth century attempts at arms limitation as he challenges the fundamental assumptions of arms control theory Arms control has never worked he concludes because it never can Existing approaches to arms control appeal to common sense but they are logically unsound and inherently impractical Gray argues because they fail to take political realities into account He outlines their inadequacies in what he calls the Arms Control Paradox the more motivated nations are to fight one another the less interested they will be in supporting significant arms limitations Under these conditions arms control agreements

must be to echo a phrase of George Will's either impossible or unimportant Documenting the naval treaties of the 1920s and 1930s and the initiatives to limit strategic nuclear arms from 1969 to the present Gray seeks to demonstrate that the fortunes of negotiated arms limitation have merely reflected the temperature of international relations rather than influencing those relations National security analysts students and scholars of international relations and others interested in arms control issues will want to read House of Cards and debate its conclusions
