Cho,2013-01-30 Cancer is one of the leading killers in the world and the incidence is increasing but most cancer patients and cancer survivors suffer much from the disease and its conventional treatments side effects In the past clinical data showed that some complementary and alternative medicine CAM possessed anticancer abilities but some clinicians and scientists have queried about the scientific validity of CAM due to the lack of scientific evidence There is great demand in the knowledge gap to explore the scientific and evidence based knowledge of CAM in the anticancer field With this aim a book series is needed to structurally deliver the knowledge to readers Integrative therapies comprise a variety of non pharmacological interventions that assist in alleviating physical and psychological symptoms Apart from being a life threatening disease cancer and its therapy are usually associated with a significant deterioration in the quality of life There is growing evidence that non pharmacological therapies provide symptom and pain management in cancer palliation This volume is a specialised book presenting the research evidence relevant to the application of a range of commonly used non pharmacological interventions in supportive cancer care including massage acupressure Qigong yoga mind body therapy mindfulness based intervention and aromatherapy A number of scientific researches and clinical studies support that these

[Choosing Effective Support for People on the Autism Spectrum](#) Matthew Bennett, Emma Goodall, Jane Nugent, 2020-12-22. This book is essential for anyone interested in learning about the therapeutic potential of orthodox and state-of-the-art supports for autistics. Using research evidence, supports are rated using a Gold-Silver-Bronze and Tin category system. Gold is extremely promising and use with confidence, whereas Tin is extremely unsafe and potentially life-threatening. This book, however, is more complex than just presenting literature reviews about supports for autistics and then rating the efficacy of the support. In addition to this, the insights and experiences of autistics about the autism supports examined are presented. Such testimonials provide an insider perspective from those who ultimately stand to benefit or suffer after receiving a support, namely autistics themselves.
