Art And Practice Of Plastic Surgery:

Body Contouring Melvin A. Shiffman, Alberto Di Giuseppe, 2010-09-14 As plastic surgeons we seek to combine art and science to improve the results we see in clinical practice Through our artistic sensibilities we try to understand and obtain aesthetic results Scientific analysis provides the data to predict which approaches will be successful and safe Both art and science connote a high level of skill or mastery At the present time our literature is replete with descriptions of specific procedures for body contouring However there remains a need for a definitive reference describing the basic principles to address the complete scope of body contouring including the postbariatric patient and their plastic surgery deformities Dr Shiffman and Dr Di Giuseppe saw this need and sought to address the needs of plastic surgeons faced with the complexities of body contouring surgery This is a comprehensive text aimed at providing multiple perspectives The numerous sections which include a posity and lipolysis the breast abdomen chest and buttocks the extremities and liposuction offer various approaches from the foremost authors Indeed it is with a tremendous amount of skill and mastery that Dr Shiffman and Dr Di Giuseppe have successfully edited and collated the numerous contributions to this work In addition they have authored individually or in collaboration over a dozen of the 87 total chapters Their combined work as editors and authors are evident throughout their text The final result is a comprehensive contribution that will benefit all plastic surgeons seeking to improve their approach to body contouring
