The End of Art Theory Victor Burgin, 1986-05-02 Art theory understood as those forms of aesthetics art history and criticism which began in the Enlightenment and culminated in high modernism is now at an end These essays examining the interdependencies of advertising film painting and photography constitute a call for a new art theory a practice of writing whose end is to contribute to a general theory of representations an understanding of the modes and means of symbolic articulation of our forms of sociality and subjectivity

Theories of Art Today Noël Carroll, 2000 What is art The contributors to *Theories of Art Today* address the assertion that the term art no longer holds meaning They explore a variety of issues including aesthetic and institutional theories of art feminist perspectives on the philosophy of art the question of whether art is a cluster concept and the relevance of tribal art to philosophical aesthetics Contributors to this book include such distinguished philosophers and historians as Arthur Danto Joseph Margolis and George Dickie

Modern Theories of Art 1 Moshe Barasch, 1990-02-01 This is an analytical survey of the thought about painting and sculpture as it unfolded from the early eighteenth to the mid nineteenth centuries This was the period during which theories of the visual arts particularly of painting and sculpture underwent a radical transformation as a result of which the intellectual foundations of our modern views on the arts were formed Because this transformation can only be understood when seen in a broad context of cultural aesthetic and philosophical developments of the period Moshe Barasch surveys the opinions of the artists and also treats in some detail the doctrines of philosophers poets and critics Barasch thus traces for the reader the entire development of modernism in art and art theory

Art Theory as Visual Epistemology Harald Klinke, 2014-06-26 How can we know What does knowledge mean These were the fundamental questions of epistemology in the 17th century In response to continental rationalism the British empiricist John Locke proposed that the only knowledge humans can have is acquired a posteriori In a discussion of the human mind he argued the source of knowledge is sensual experience mostly vision Since vision and picture making are the realm of art art theory picked up on questions such as are pictures able to represent knowledge about the world How does the production of images itself generate knowledge How does pictorial logic differ from linguistic logic How can artists

contribute to a collective search for truth Questions concerning the epistemic potential of art can be found throughout the centuries up until the present day However these are not questions of art alone but of the representational value of images in general Thus the history of art theory can contribute much to recent discussions in Visual Studies and Bildwissenschaften by showing the historic dimension of arguments about what images are or should be What is knowledge is as much a philosophic question as What is an image Visual epistemology is a new and promising research field that is best investigated using an interdisciplinary approach that addresses a range of interconnected areas such as internal and external images and the interplay of producer and perceiver of images This publication outlines this territory by gathering together several approaches to visual epistemology by many distinguished authors [What Art Is](#) Michelle Kamhi, Louis Torres, 2016-05-26

What is art The arts establishment has a simple answer anything is art if a reputed artist or expert says it is Though many people are skeptical about the alleged new art forms that have proliferated since the early twentieth century today's critics claim that all such work however incomprehensible is art A groundbreaking alternative to this view is provided by philosopher novelist Ayn Rand 1901-1982 Best known as the author of *The Fountainhead* and *Atlas Shrugged* Rand also created an original and illuminating theory of art which confirms the widespread view that much of today's purported art is not really art at all In *What Art Is* Torres and Kamhi present a lucid introduction to Rand's esthetic theory contrasting her ideas with those of other thinkers They conclude that in its basic principles her account is compelling and is corroborated by evidence from anthropology neurology cognitive science and psychology The authors apply Rand's theory to a debunking of the work of prominent modernists and postmodernists from Mondrian Jackson Pollock and Samuel Beckett to John Cage Merce Cunningham and other highly regarded postmodernist figures Finally they explore the implications of Rand's ideas for the issues of government and corporate support of the arts art law and art education This is one of the most interesting provocative and well written books on aesthetics that I know While fully accessible to the general reader *What Art Is* should be of great interest to specialists as well Ayn Rand's largely unknown writings on art especially as interpreted released from dogma and smoothed out by Torres and Kamhi are remarkably refined Moreover her ideas are positively therapeutic after a century of artistic floundering and aesthetic quibbling Anyone interested in aesthetics in the purpose of art or in the troubling issues posed by modernism and post modernism should read this book Randall R Dipert Author of *Artifacts Art Works and Agency* Torres and Kamhi effectively situate Rand's long neglected esthetic theory in the wider history of ideas They not only illuminate her significant contribution to an understanding of the nature of art they also apply her ideas to a trenchant critique of the twentieth century's advanced art Their exposure of the invalidity of abstract art is itself worth the price of admission Chris Matthew Sciabarra Author of *Ayn Rand The Russian Radical* Rand's esthetic theory merits careful study and thoughtful criticism which Torres and Kamhi provide Their scholarship is sound their presentation is clear and their judgment is refreshingly free from the biases that Rand's supporters and detractors alike tend to bring to

Taylor,1987 This unique and extraordinarily rich collection of writings offers a thematic approach to understanding the various theories of art that illumined the direction of nineteenth century artists as diverse as Tommaso Minardi and Georges Seurat It is significant that during the nineteenth century most artists felt compelled to found their artistic practice on a consciously established premise Modern Theories of Art 1 Moshe Barasch,1990-01-01 This is an analytical survey of the thought about painting and sculpture as it unfolded from the early eighteenth to the mid nineteenth centuries This was the period during which theories of the visual arts particularly of painting and sculpture underwent a radical transformation as a result of which the intellectual foundations of our modern views on the arts were formed Because this transformation can only be understood when seen in a broad context of cultural aesthetic and philosophical developments of the period Moshe Barasch surveys the opinions of the artists and also treats in some detail the doctrines of philosophers poets and critics Barasch thus traces for the reader the entire development of modernism in art and art theory Early Modern Art Theory. Visual Culture and Ideology, 1400-1700 James Hutson,2016-03 The development of art theory over the course of the Renaissance and Baroque eras is reflected in major stylistic shifts In order to elucidate the relationship between theory and practice we must consider the wider connections between art theory poetic theory natural philosophy and related epistemological matrices Investigating the interdisciplinary reality of framing art making and interpretation this treatment rejects the dominant synchronic approach to history and historiography and seeks to present anew a narrative that ties together various formal approaches focusing on stylistic transformation in particular artist s oeuvres Michelangelo Annibale Carracci Guercino Guido Reni Poussin and others and the contemporary environments that facilitated them Through the dual understanding of the art theoretical concept of the Idea an evolution will be revealed that illustrates the embittered battles over style and the overarching intellectual shifts in the period between art production and conceptualization based on Aristotelian and Platonic notions of creativity beauty and the goal of art as an exercise in encapsulating the divine truth of nature *Think Art* Jean-Marie Schaeffer,1998 Schaeffer says the object of aesthetics should be the behaviors the relations that link us to the world of the works and to the world in general
