The Cognitive Connection Howard Levine, Howard Rheingold, 1987 Discusses the differences between natural language and programming languages looks at mathematical logic and describes the future of computer programming **Musical Languages** Joseph Peter Swain, 1997 The illustrations used in the book range from the most elemental speech sounds to the poetry of Emerson from a single saxophone note to the grandest passages of Beethoven they include discussions of medieval polyphony and the music of Josquin Palestrina Monteverdi Bach Mozart Wagner Debussy Schoenberg and American jazz all within their historical contexts Such scope shows how deep the analogy between music and language really is *Aaron's Code* Pamela McCorduck, 1991 Aaron's Code tells the story of the first profound connection between art and computer technology Here is the work of Harold Cohen the renowned abstract painter who at the height of a celebrated career in the late 1960s abandoned the international scene of museums and galleries and sequestered himself with the most powerful computers he could get his hands on What emerged from his long years of solitary struggle is an elaborate computer program that makes drawings autonomously without human intervention an electronic apprentice and alter ego called Aaron Macintosh Hypermedia: Reference guide Michael Fraase, 1990 Band 1 **PC World**, 1988 **Farallon's Media Tracks** Michael Fraase, 1991 **The Computational Metaphor and Artificial Intelligence** David Martin West, 1988 The Ubiquitous Chip W. Loeffler, Tim Anderson, 1994 A collection of reports from the frontiers of virtual space with detailed coverage of cutting edge projects in Australia New Zealand Europe and the US demonstrating how the technology is being used by artists educators cyberpunks and multinational companies Discusses technical legal and social issues facing the interactive world and cultural and
