Cognitive Mapping Past Present And Future:

Cognitive Mapping Scott Freundschuh, NATIONAL UNIV OF IRELAND, 2018-10-24 This important work brings together international academics from a variety of disciplines to explore the topic of spatial cognition on a geographic scale It provides an overview of the historical origins of the subject a description of current debates and suggests directions for future research

Ethics and Visual Research Methods Deborah Warr, Marilyns Guillemain, Susan Cox, Jenny Waycott, 2016-12-27 This collection presents stories from the field that were gathered from researchers using a breadth of visual methods Visual methods refer to the use of still or moving images either as forms of data to explore research topics and explorations of artistic practice In addition to well established visual methods such as photo voice and photo elicitation the possibilities for visual methods are flourishing through the proliferation of visual culture and developments in digital technologies

Methodological and ethical issues are emerging as visual methods are adapted and applied to answer new kinds of research questions and in varied settings and populations Authors offer practical and thoughtful discussions of emerging methodological and ethical dilemmas they encountered in innovative projects that used visual methods either in combination with other methods or as a stand alone method The discussions will be of interest to those seeking to understand the value and potential ethical risks of visual methodologies for social research

The Map Reader Martin Dodge, Rob Kitchin, Chris Perkins, 2011-05-09 WINNER OF THE CANTEMIR PRIZE 2012 awarded by the Berendel Foundation The Map Reader brings together for the first time classic and hard to find articles on mapping This book provides a wide ranging and coherent edited compendium of key scholarly writing about the changing nature of cartography over the last half century The editorial selection of fifty four theoretical and thought provoking texts demonstrates how cartography works as a powerful representational form and explores how different mapping practices have been conceptualised in particular scholarly contexts Themes covered include paradigms politics people aesthetics and technology Original interpretative essays set the literature into intellectual context within these themes Excerpts are drawn from leading scholars and researchers in a range of cognate fields including Cartography Geography Anthropology Architecture Engineering Computer Science and Graphic Design The Map Reader provides a new unique single source reference to the essential literature in the cartographic field more than fifty specially edited excerpts from key classic articles and monographs critical introductions by experienced experts in the field focused coverage of key mapping practices techniques and ideas a valuable resource suited to a broad spectrum of researchers and students working in cartography and GIScience geography the social sciences media studies and visual arts full page colour illustrations of significant maps as provocative visual think pieces fully indexed clearly structured and accessible ways into a fast changing field of cartographic research

Changing Visions Ervin Laszlo, 1996-05-28 The four authors of this book recognize that no one on the common human journey to the 21st century can pick the best route without consulting a map that is to say an interconnected set of understandings about what in a given

situation is important what demands action and attention and what does not The problem they contend is that the picture of the world we each carry in our mind may not be a true mapping of the reality that surrounds us This picture the cognitive map could always be sharper The authors prompt us to become more conscious of our own cognitive map and explain how it can be adapted to the exigencies of our changing world so that it can be better used to guide our steps toward the 21st century We all carry a picture of the world in our mind but is that map an assuredly true layout of the reality that surrounds us If not how can we use it to guide our steps toward the 21st century and beyond without creating shocks and surprises that impair our well being and threaten our survival We shall not survive either as individuals or as a species if our maps fail to reflect accurately the nature of the world that surrounds us The authors attempt through reviewing the origins development and current changes in individual and social cognitive maps to prompt readers to become more conscious of their own map and hence be better able to adapt it to the exigencies of our changing world The book ends with a vision of the global bio and socio sphere the unified cognitive map which is emerging in laboratories and workshops of the new physics the new biology the new ecology and the avant garde branches of the social and historical sciences But Changing Visions recognizes that these sciences alone cannot promote the formation of faithful maps of lived reality and that religion common sense and even art can fill in and sharpen one s world picture

Toward an Anthropology of Nation Building and Unbuilding in Israel Fran Markowitz, Stephen Sharot, Moshe Shokeid, 2015 Toward an Anthropology of Nation Building and Unbuilding in Israel presents twenty two original essays offering a critical survey of the anthropology of Israel inspired by Alex Weingrod emeritus professor and pioneering scholar of Israeli anthropology In the late 1950s Weingrod s groundbreaking ethnographic research of Israel s underpopulated south complicated the dominant social science discourse and government policy of the day by focusing on the ironies inherent in the project of Israeli nation building and on the process of migration prompted by social change Drawing from Weingrod s perspective this collection considers the gaps ruptures and juxtapositions in Israeli society and the cultural categories undergirding and subverting these divisions Organized into four parts the volume examines our understanding of Israel as a place of difference the disruptions and integrations of diaspora the various permutations of Judaism and the role of symbol in the national landscape and in Middle Eastern studies considered from a comparative perspective These essays illuminate the key issues pervading motivating and frustrating Israel s complex ethnoscape
