Drawing the Map of Life Viktor K. McElheny, 2012-07-31 Drawing the Map of Life is the dramatic story of the Human Genome Project from its origins through the race to order the 3 billion subunits of DNA to the surprises emerging as scientists seek to exploit the molecule of heredity It's the first account to deal in depth with the intellectual roots of the project the motivations that drove it and the hype that

often masked genuine triumphs Distinguished science journalist Victor McElheny offers vivid insightful profiles of key people such as David Botstein Eric Lander Francis Collins James Watson Michael Hunkapiller and Craig Venter McElheny also shows that the Human Genome Project is a striking example of how new techniques such as restriction enzymes and sequencing methods often arrive first shaping the questions scientists then ask Drawing on years of original interviews and reporting in the inner circles of biological science Drawing the Map of Life is the definitive up to date story of today s greatest scientific quest No one who wishes to understand genome mapping and how it is transforming our lives can afford to miss this book
