Collapsing Universe:

The Collapsing Universe Isaac Asimov, 1980-03-03 In a world of starquakes anti matter red giants and white dwarfs a star more massive than our own sun can disappear into a black hole from which not even light can escape When this happens the laws of physics have no meaning Here is one of the great detective stories of modern science followed to its conclusion by one of the most respected scientists writing today It is a totally absorbing investigation of a phenomenon only recently discovered that may explain the mysterious 30 megaton blast that flattened a Siberian forest in 1908 and that may ultimately be responsible for the collapse of the present universe book cover **Introduction to Cosmic Inflation and Dark Energy**

Konstantinos Dimopoulos, 2020-11-24 Cosmic inflation and dark energy hold the key to the origin and the eventual fate of the Universe Despite the increasing prominence of these subjects in research and teaching over the past decade or more no introductory textbook dedicated to these topics has been previously published Dr Konstantinos Dimopoulos is a highly regarded expert in the field and an experienced communicator of the subject to students In this book he provides advanced undergraduate and early graduate students with an accessible introduction and equips them with the tools they need to understand the cosmology of cosmic inflation and dark energy Features Provides a concise pedagogical crash course in big bang cosmology focusing on the dynamics and the history of the Universe with an emphasis on the role of dark energy Chapters contain questions and problems for readers to test their understanding The first book to make cosmic inflation and dark energy accessible to students God Is Mathematics Dr. Thomas Stark, What s the most radical idea possible the one least likely to be understood by humanity the one so far beyond humanity s level of intelligence that whoever champions it is likely to be regarded as insane Go on if you re smart you ought to be conceive of a connection so unobvious so invisible to the masses so improbable in relation to any other idea that it will be almost universally rejected That idea despised mocked and reviled by practically everyone will be the No 1 candidate for being the authentic answer to existence Pythagoras was the genius that delivered this idea 2 500 years ago when he said All things are numbers The last connection that the average person would ever make when they look at the world is that what they are actually seeing beyond the level of superficial appearance is nothing but numbers That is the ultimate unthinkable thought God is Mathematics **The collapsing**

Universe Isaac Asimov, 1975 **Light after Dark I** Charles Francis, 2016-09-19 Light After Dark 1 is a collection of well established but up to date science both from theory and observation including material from Charles Francis published papers Francis considers arguments both for and against two of the most controversial ideas in modern cosmology Based on established physics he suggests that unobserved and exotic substances cold dark matter and dark energy can be replaced by an improved understanding of the creation of large scale structure following the Big Bang The structures and the physics of the universe as we observe it are described and placed in the context of Big Bang cosmology Further topics include large scale structure entropy and the arrow of time the creation of the elements the structure and evolution of galaxies and stars

Newtonian gravity the structure of the Milky Way and other spiral galaxies galaxy rotation curves and Friedmann cosmology This fascinating exploration of the universe as it is revealed by physical theory and the observations of astronomers will appeal to students of astronomy and astrophysicists and anyone intrigued by the universe in which we live Written without equations and with helpful explanations of physical concepts it is accessible to both scientists and non specialist readers alike

What Caused the Big Bang? Rem B. Edwards, 2021-07-26 This book critically explores answers to the big question What produced our universe around fifteen billion years ago in a Big Bang It critiques contemporary atheistic cosmologies including Steady State Oscillationism Big Fizz Big Divide and Big Accident that affirm the eternity and self sufficiency of the universe without God This study defends and revises Process Theology and arguments for God s existence from the universe s life supporting order and contingent existence

Wedge Word, Abc's One: Steve William, 2025-09-11 Many people have heard that the universe began with a big bang Surprise big light is a better term Even so many assume this Big Bang Light means there is no God behind it Some scientists have been trying to prove as much for as long as we realized there was a Big Light but always God s Creative Moment is the most scientific empirical and data laden explanation
