Code Civil 2004:

Towards a Chinese Civil Code Lei Chen, C.H. van Rhee, 2012-11-13 Currently China is drafting its new Civil Code. Against this background the Chinese legal community has shown a growing interest in various legal and legislative ideas from around the world. **Towards a Chinese Civil Code** aims at providing the necessary historical and comparative legal perspectives. The book addresses the following topics: property law, contract law, tort law, and civil procedure. **Redefining Codification** Dirk Heirbaut, 2024-12-10 More than half of the world's population lives under law codes. Yet defining the concept of codification remains elusive. Rather than delving into abstract theories, this book provides a rich and contextual comparative legal history of codes in France, Germany, the Netherlands, and Belgium from the late eighteenth century to the present. The author starts by examining the evolution of French, German, Dutch, and Belgian codes in their political and comparative context, thus challenging deeply rooted national narratives. He covers the well-studied civil codes and the often overlooked commercial and procedural codes and drafts that failed to become law. Against this backdrop, the book embarks on a comprehensive analysis of the factors contributing to the success or failure of codification efforts. Employing an innovative method of comparative legal history, **Redefining Codification** explores the key players and objectives behind codification, revealing that traditional notions of codification are far removed from reality. Following the deconstruction of some universal truths about codifications, this volume offers fresh insights into the behind-the-scenes of the lawmaking machinery and an empirically based definition of codification.

The Oxford Handbook of Comparative Law Mathias Reimann, Reinhard Zimmermann, 2006-11-16 The **Oxford Handbook of Comparative Law** provides a wide-ranging and highly diverse critical survey of comparative law at the beginning of the twenty-first century. It summarizes and evaluates a discipline that is time-honoured but not easily understood in all its dimensions. In the current era of globalization, this discipline is more relevant than ever, both on the academic and on the practical level. The Handbook is divided into three main sections. Section I surveys how comparative law has developed and where it stands today in various parts of the world. This includes not only traditional model jurisdictions such as France, Germany, and the United States, but also other regions like Eastern Europe, East Asia, and Latin America. Section II then discusses the major approaches to comparative law, its methods, goals, and its relationship with other fields such as legal history, economics, and linguistics. Finally, section III deals with the status of comparative studies in over a dozen subject-matter areas, including the major categories of private, economic, public, and criminal law. The Handbook contains forty-two chapters, which are written by experts from around the world. The aim of each chapter is to provide an accessible, original, and critical account of the current state of comparative law in its respective area, which will help to shape the agenda in the years to come. Each chapter also includes a short bibliography referencing the definitive works in the field.
