Codeword Freedom

Robert Perry Jr.

Codeword Freedom:

The Wehrmacht's Last Stand Robert M. Citino, 2020-07-09 By 1943 the war was lost and most German officers knew it. Three quarters of a century later the question persists: What kept the German army going in an increasingly hopeless situation? Where some historians have found explanations in the power of Hitler or the role of ideology, Robert M. Citino, the world's leading scholar on the subject, posits a more straightforward solution: *Bewegungskrieg*, the way of war cultivated by the Germans over the course of history. In this gripping account of German military campaigns during the final phase of World War II, Citino charts the inevitable path by which *Bewegungskrieg* or a war of movement inexorably led to Nazi Germany's defeat. *The Wehrmacht's Last Stand* analyzes the German *Totenritt* or death ride from January 1944, with simultaneous Allied offensives at Anzio and Ukraine, until May 1945, the collapse of the Wehrmacht in the field and the Soviet storming of Berlin. In clear and compelling prose and bringing extensive reading of the German language literature to bear, Citino focuses on the German view of these campaigns. Often very different from the Allied perspective, this approach allows for a more nuanced and far-reaching understanding of the last battles of the Wehrmacht than any now available. With Citino's previous volumes, *Death of the Wehrmacht* and *The Wehrmacht Retreats*, *The Wehrmacht's Last Stand* completes a uniquely comprehensive picture of the German army's strategy, operations, and performance against the Allies in World War II. **We Will Not Go to Tuapse** Fernand Kaisergruber, 2016-03-16 A soldier with the German Army's Wallonian Legion chronicles his experience as a foreign volunteer for the Nazi war machine during WWII. A French-speaking Belgian, Fernand Kaisergruber volunteered to fight with the military force that occupied his country. His detailed chronicle of that time reads like a travelogue of the Eastern Front campaign. Until recently, very little was known of the tens of thousands of foreign nationals who fought with the Germans. Kaisergruber's book sheds light on issues of collaboration, the experiences and motives of volunteers, and the reactions they encountered in occupied countries. Kaisergruber draws upon his wartime diaries, those of his comrades, and his later work with them while secretary of their postwar veterans' league. Although unapologetic for his service, he makes no special claims for the German cause. He writes instead from his firsthand experience as a young man entering war for the first time. His narrative is full of observations of fellow soldiers, commanders, Russian civilians, and battlefields. **Invasion** Robert Perry Jr., 2008-09-15 A foreign country enters the nuclear age and begins to flex its military might against the only country that stands in its way for world power: The United States of America. It falls to the captain and crew of a newly launched nuclear submarine to determine their intentions, and the SEAL detachment on board are put to the test in this quest. **LTE for 4G Mobile Broadband** Farooq Khan, 2009-03-26 Do you need to get up to speed quickly on LTE? Understand the new technologies of the LTE standard and how they contribute to improvements in system performance with this practical and valuable guide written by an expert on LTE who was intimately involved in drafting the standard. In addition to a strong grounding in the technical details, you'll also get fascinating insights into why particular technologies

were chosen in the development process Core topics covered include low PAPR orthogonal uplink multiple access based on SC FDMA MIMO multi antenna technologies and inter cell interference mitigation techniques Low latency channel structure and single frequency network SFN broadcast are also discussed in detail With extensive references a useful discussion of technologies that were not included in the standard and end of chapter summaries that emphasize all the key points this book is an essential resource for practitioners in the mobile cellular communications industry and for graduate students studying advanced wireless communications
