Customs Modernization Handbook:

Customs Modernization Handbook Luc De Wulf, Jose B. Sokol, 2005-01-03 Trade integration contributes substantially to economic development and poverty alleviation In recent years much progress was made to liberalize the trade regime but customs procedures are often still complex costly and non transparent This situation leads to misallocation of resources Customs Modernization Handbook provides an overview of the key elements of a successful customs modernization strategy and draws lessons from a number of successful customs reforms as well as from customs reform projects that have been undertaken by the World Bank It describes a number of key import procedures that have proved particularly troublesome for customs administrations and traders and provides practical guidelines to enhance their efficiency The Handbook also reviews the appropriate legal framework for customs operations as well as strategies to combat corruption

Customs Modernization Initiatives Luc De Wulf, Jose B. Sokol, 2004-08-01 A companion to the Customs Modernization Handbook this book provides case studies on customs modernization initiatives in seven countries Bolivia Morocco Mozambique Peru the Philippines Turkey and Uganda The initiatives in each of these countries show similarities as well as differences in their approach and design Some have relied on a model of independent revenue authorities Uganda and Peru others have called upon private sector service providers to initiate the modernization process Mozambique others have taken the drastic step of a complete overhaul of their customs staff Bolivia and Mozambique others introduced new information technology to streamline customs processes and to integrate other members of the trading community into an electronic network Ghana while still others have approached the modernization process as a pragmatic well focused result oriented process

Trade and Transport Corridor Management Toolkit Charles Kunaka, Robin Carruthers, 2014-05-07 Trade and transport corridors major routes that facilitate the movement of people and goods between regions and between countries have existed for millennia They enable regions and countries to offer high capacity transport systems and services that reduce trade and transport costs by creating economies of scale Regional corridors are particularly important to landlocked countries often providing the only overland routes to regional and international markets Despite a long and complex history guidance is often lacking on how to design determine the components to include and analyze the impact of corridor projects The Trade and Transport Corridor Management Toolkit fills this void The Toolkit synthesizes the experiences of the World Bank and other development agencies in assessing designing implementing and evaluating the impact of trade and transport corridor projects It saves project developers the task of looking for the best available tools and ensures greater consistency to facilitate comparison and benchmarking The Toolkit will also be of immense value to policy makers in provincial and national governments as well as regional economic institutions for several reasons Corridors affect the space economy of countries they are best developed with clear estimates of the spatial impacts that can be expected A corridor system has multiple components including infrastructure roads railways ports transport and logistics services and regulations it is important to appreciate the linkages between them particularly as the overall performance of a corridor is determined by the weakest component Many parties with varying interests and motivations have a stake in corridor development The Toolkit argues for their full participation in corridor development processes and operations The best functioning modern corridors in the world did not happen by accident they are often the results of coordinated development and cooperation over many years The general principles outlined in this Toolkit should help project teams government officials logistics service providers and the trade community to better appreciate both the importance of good corridor project design and the challenges of and possibilities from improving corridor performance
