

UNIT 6: BASIC CONCEPTS OF TECHNICAL DRAFTING, ILLUSTRATION, 2D ANIMATION AND MEDICAL TRANSCRIPTION

A. TECHNICAL DRAFTING CONCEPTS

➤ What is Drafting?

Drafting – also called technical drawing – is the process of creating accurate representations of buildings, houses, or objects for architectural, engineering or technical purposes. This work is done by a person called a draftsman or drafts person, or, less commonly, a building drafter, drafting officer or building designer.

Technical drawing can be defined as the elaborate graphic representation of an object, concept, or idea through a universal language or code of practice that uses scales, graphic symbols, dimensions, and perspectives, with the aid of either drawing equipment/tools, freehand, or computer-aided design (CAD).

Technical drawing is used in many professions (engineering, architecture, manufacturing, construction, estate management, etc.) to draw or draft ideas and different views of physical objects like drainages, culverts, septic tanks, incinerators, houses, etc. Drawing—either artistic or technical—is one of the oldest forms of communication and is believed to be older than verbal communication. Generally, there are two types of drawings: artistic drawing, and technical drawing:

✓ Artistic drawing

Artistic drawing is the type of drawing that is abstract because its meaning is in most cases unique to its creator or the person/artist who creates it. In order to understand the meaning of an artistic drawing, one has to understand the artist's point of view or motivation for producing a particular artistic drawing.

Sometimes, it is necessary to understand an artist in order to understand their artistic drawing because artists often take a unique/abstract approach when communicating through their drawings. This type of approach gives rise to various interpretations when their drawings are exposed to public view.

Regardless of how complex artistic drawings may appear, they express the clear feelings, beliefs, philosophies, and ideas of the artists who create them. Artistic drawings are generally freehand drawings or drawings created without the use of drawing instruments/tools.

✓ Technical drawing

Technical drawing, on the other hand, is the type of drawing that is not abstract because everyone who uses it, understands it, owing to the obvious fact that universally or widely accepted drawing instruments/tools must be employed in creating it (i.e., the drawing). In order to understand a technical drawing, one does not necessarily have to understand what its creator has in mind; rather, one needs to have a good understanding of the symbols, perspectives, scales, and universally accepted tools, codes, and conventions that are used in creating or producing technical drawings.
