Special Issue on Drugs and Driving ,1904 **Drugs & Driving** ,1984 *Drugs, Driving and Traffic Safety* Joris C. Verster, S. R. Pandi-Perumal, Jan G. Ramaekers, Johan J. de Gier, 2009-08-29 Drugs Driving and Traffic Safety gives a comprehensive overview of the effects of different medical conditions like neurological disorders anxiety and depression and their pharmaceutical treatment on driving ability In addition the effects of alcohol and drugs of abuse are discussed Leading experts present the different methodologies to examine effects of drugs on driving and summarize the recent scientific evidence including epidemiological studies roadside surveys laboratory tests driving simulators and the standardized driving test The volume includes guidelines of the International Council on Alcohol Drugs and Traffic Safety ICADTS and the ICADTS Drugs List 2007 Drugs Driving and Traffic Safety is written for physicians psychiatrists and pharmacists who want to inform their patients who use psychoactive drugs **Presidential Initiative on Drugs Driving and Youth** ,1997 *Drugs and Driving* International Transport Forum, 2010-11-10 Driving while impaired by drugs whether licit or illicit has emerged as an important road safety issue This report provides a state of the art review of the role and impact of drugs in road accident risk It reviews the legislation deterrence and roadside detection practices in member countries as well as preventative measures to combat drug use while driving It provides recommendations on strategies to adopt in addressing this issue with a view to contributing to a safe system approach and saving further lives on the roads *Drink and drug driving law* Great Britain: Parliament: House of Commons: Transport Committee, 2010-12-02 18% of all drivers killed in road accidents are over the drink drive limit In 2007 based on coroners data but only approximately 3% of drivers in the UK are stopped and tested for alcohol compared to the European average of 16% This report calls for the police to be given an additional power to permit preliminary breath tests as part of any designated drink drive enforcement operation Currently the police may stop any vehicle but can only test the driver s breath if there is an element of suspicion There is concern that a reduction in the blood alcohol concentration limit would send out mixed messages but that the aimed for effectively zero limit is too great a step at present Instead concentration should be on stricter enforcement of the current limit and public education It is felt that the success of Great Britain s drink driving policy to date is largely attributable to the deterrent effect of the current 12 month mandatory disqualification penalty and the Committee supports retaining that penalty The committee also calls for the improvement of the detection of drug driving and to strengthen public perception about the likelihood of drug drivers being caught by the police The Government s commitment to install drug screening devices in every police station by 2012 is welcomed though this interim measure should not eclipse the Government s aim over the medium term to develop and type approve a drug screening device for use at the roadside drawing on relevant experience of doing this in the other parts of the world [Drugs And Driving](#) Mary B. that the presence of a drug in a driver's body is indicative of the driver's performance actually being impaired by that drug at the time of a collision or apprehension by the police Short term Researchers could consider adopting the protocol for assessing the potential of drugs to impair driving recently developed in the United States as a guide to further research on drugs and driving in Canada Encourage increased testing of fatally injured drivers by coroners medical examiners so that at least 70% of the drivers are tested for the presence of drugs in each jurisdiction Short term Establish the percentage of fatally injured drivers testing positive for drugs other than alcohol in their blood as the primary measure of changes in drugs and driving Use roadside surveys conducted during 2012 and at the end of RSS 2015 i e 2016 to determine whether the prevalence of drugs and driving has changed Use social surveys conducted during 2012 and at the end of RS CCMTA Drugs and Driving Framework Page 11 May 25 2012 1 1 Purpose of the Framework The purpose of this Drugs and Driving Framework DDF is to provide an environmental scan of the drugs and driving issue in Canada and several other countries by reviewing the effects of illicit e g cannabis prescription and over the counter drugs on driving performance the research on the prevalence of The main sources for the following description of the effects of these drugs are the Driving under the Influence of Drugs Alcohol and Medicine DRUID project Berghaus et al 2010 the report on Drugs and Driving by the Organization for Economic Cooperation and Development OECD Beirness et al 2010 Jonah et al Drugs and Driving Detection and Deterrence OECD,2010-10-08 This report provides a state of the art review of the role and impact of drugs in road accident risk It reviews the legislation deterrence and roadside detection practices in member countries as well as preventative measures to combat drug use while driving **Marijuana, Other Drugs and Their Relation to Highway Safety** United States.
