1960s high schools had become mass institutions saddled with the expectation of universal education for America's youth. Ironically with this broadening of clientele and mission came the idea and phenomenon of the dropout. The consolidation of a dropout stereotype focused on the presumed dependency and delinquency of dropouts with the resulting programs focusing on guidance and vocational training. Why the problem persists is the topic of this study with more constructive perspectives on dropping out.

**School Dropouts** Marnie S. Shaul, 2002-08 Over the last decade up to 544,000 10th through 12th grade students dropped out of school each year without completing a high school program. In Oct 2000 about 11% of 16 through 24 year olds who were not enrolled in a HS program had neither a high school diploma nor an equivalent credential. This report addresses these questions: what are the national and regional dropout rate trends? what does the research say about factors associated with dropping out? what state, local, or private efforts have been implemented to address the factors associated with dropping out? and what Fed efforts exist to reduce dropout rates and what is known about their effectiveness. *Leaving to Learn* Elliot Washor, Charles Mojkowski, 2013 We have a bold strategy for revitalizing schools and for graduating and preparing young people for success in their future learning and work. This leaving to learn strategy is driven by our image of that future. Our goal is not merely to graduate every student but to prepare graduates who are uncommonly ready for success in their workplaces and their communities. Elliot Washor and Charles Mojkowski. It's an alarming fact in the U.S. one student drops out of school every 12 seconds. Elliot Washor and Charles Mojkowski, both of Big Picture Learning, have a proven, innovative solution for stemming the flow of dropouts and breaking the cycle of disengagement that leads up to it. It's called leaving to learn. Leaving to Learn helps us deeply understand the real reasons kids drop out and the essential conditions for productive learning that today's adolescents require. The authors then make a compelling argument in order to retain students through to graduation, schools must offer experiences where students do some of their learning outside of school. With common sense rules of the road, the authors offer nuts and bolts guidelines for implementing a high quality Leaving to Learn program, including examples of the many forms of out-of-school learning: internships, travel, community service, independent projects, and more, seamlessly integrating students' outside learning with in-school curriculum, assigning academic credit for out-of-school accomplishments. Isn't it time to try more innovative ways to address the challenges of our nation's dropout rate? We can keep kids in school and prepare them for life after graduation by delivering authentic learning experiences that matter to them. The first step is taking down the barriers between school and the outside world. The first step is letting them leave to learn.

Do Children Drop Out of School in Kindergarten? Gregory P. Hickman, Randy S. Heinrich, 2011-09-28 For years we have considered school dropout rates as a problem occurring at the high school level. However, this is actually an issue that originates and develops in elementary school. In *Do Children Drop Out of School in Kindergarten*, Gregory Hickman and Randy Heinrich show how high school dropouts in many ways drop out of school long before they reach high school. Using a comprehensive systems approach, Hickman and Heinrich argue that our policy makers

educators parents and community members need to scrutinize our education system moving past fixing short term symptoms to engaging core long term problems for deep effective change For real change to take place our national agenda needs to address the dropout problem at the elementary level long before kids enter high school **Dropouts in America** Gary Orfield,2004 Only half of our nation s minority students graduate from high school Dropouts in America confronts the challenges facing urban schools as well as strategies to combat increasing high school dropout rates in the face of higher academic expectations **Dropping Out--problem Or Symptom?** Jerald G. Task Force on School Dropouts,1970 **Framing Dropouts** Michelle Fine,1991-03-05 I think this is the most important work I have read in over a decade on the sociology and politics of school dropouts Fine combines a narrative structure with a rigorous theoretical discourse that allows the reader to both hear the voices of those involved in the dropout situation as well as to have the opportunity to reflect critically on the ideological and material forces that structure the dropout issue as a social problem I am convinced that it will be a major influence in the field and will establish a new theoretical standard for inquiry into the area of school dropouts Henry A Giroux Professor and Renown Scholar in Residence Department of Educational Leadership Miami University As a critical ethnography this manuscript is thoughtful compassionate and compelling Fine is able to document the braiding of race class gender in sophisticated ways and this is one of the text s greatest strengths The link between those who drop out and the restriction of critique is powerfully achieved Fine has successfully re presented the complexities of urban education She should be applauded for her integration of black and feminist theorists I believe this text is pioneering It opens the literature on adolescents placed at risk to include contexts previously ignored This should be required reading for all school personnel future teachers and those associated with educational contexts Deborah P Britzman Department of Education State University of New York Binghamton What Fine does is show us in depth the reality of the situation we often wish would just go away We are forced to confront what pain is engendered by our public institutions and consider how we might take up the challenge to do something about it Roger I Simon Ontario Institute for Studies in Education **Dropping Out Or Hanging in** Duane Brown,1998 **Dropping Out** Russell W.
