Adults are the most common population encountered by researchers, clinicians, and students, and therefore more than 150 entries were needed to cover all necessary methods. The second volume covers Child Clinical Applications in 140 entries. One especially useful aspect of this volume will be the complications sections addressing what can go wrong in working with children. This is an area often overlooked in journal articles on the subject. Volume III Educational Applications addresses a range of strategies and principles of applied behavior analysis, positive behavior support, and behavior modification and therapy. These entries focus on classroom and school contexts in which the instructional and behavioral interactions between teachers and their learners are emphasized. Unique, Easy to Follow Format: Each of the volumes' entries address a full range of mental health conditions and their respective treatments, with the aim of providing systematic and scientific evaluation of clinical interventions in a fashion which will lend itself to the particular style of treatment common to behavior modification. Major entries for specific strategies follow a similar format: 1 Description of the Strategy, 2 Research Basis, 3 Relevant Target Populations and Exceptions, 4 Complications, 5 Case Illustration, 6 Suggested Readings, 7 Key Words. Academic and research librarians in the social sciences, health, and medicine will all find this an invaluable addition to their collections. Key Features: Three thematic volumes and over 430 total entries. Five anchor articles in each volume provide context on major issues within the field.
