

PERCEIVED BEHAVIORAL CONTROL

Perceived Behavioral Control is a concept from the theory of planned behavior that refers to the extent to which people believe they are capable of performing a certain action.

OVERVIEW

We can measure perceived behavioral control by weighing the difficulty of the task against our perceived capabilities. Other influencing factors in the theory of planned behavior that help us predict a person's future behavior include subjective norms (perceived peer pressure) and personal attitudes.

EXAMPLE

Healthy Eating: Despite the convenience and temptation of fast food and processed meals, you believe in your ability to maintain a balanced, nutritious diet. This might involve preparing meals at home, choosing healthier options when dining out, or resisting unhealthy snacks.

Behavior The Control Of Perception

SB Merriam

Behavior The Control Of Perception:

The book delves into Behavior The Control Of Perception. Behavior The Control Of Perception is an essential topic that must be grasped by everyone, from students and scholars to the general public. The book will furnish comprehensive and in-depth insights into Behavior The Control Of Perception, encompassing both the fundamentals and more intricate discussions.
