

“Beginning to Read: Thinking and Learning about Print” by Marilyn Jager Adams

Topic: Education | Words: 548 | Pages: 2

The current research study is based on the summary “Beginning to Read: Thinking and Learning about Print” written by Marilyn Jager Adams. The reading instruction is analyzed with a view to different methods and approaches suchlike logographic, syllabic, and alphabetic. Such aspects as the impact on reading instruction and implications for reading instruction in the classroom are discussed in the research study as well as phonics instruction. Children should be encouraged to read aloud and recite what they understood from the print. Apprehension of information should be basic for reading instruction; recognizing letters and differentiating them from phonemes improves the process of reading.

There are different methods of presenting information that can be read and understood; these methods include logographic, syllabic, and alphabetic ones. When a skillful reader reads a print, he or she understands the information effortlessly without thinking hard about the meaning of separate words because the context helps to create the overall image of the print message. When a child is aware of the meaning of letters, recognizes them well, and is capable of reading and understanding phrases as well as separate words, he/she is believed to acquire information quickly.
