

Beginning Microscope Lab

Objective: To practice using the microscope properly; To properly prepare a wet mount; To observe simple specimens and determine magnification.

Materials:

Compound Microscope

Cover slip

Eyedropper

Small square of newsprint from newspaper containing letter 'e'

Scissors

Microscope slide, clean and dry

Beaker of water

Any of the following:

- hair strand
- insect wing
- fuzzy thread
- prepared slide

Procedure:

1. From the newsprint, cut out a small portion of a word that contains the letter 'e'.
2. Place this in the middle of a clean, dry microscope slide.
3. Using your eyedropper, place 1-2 drops of water on top of the newsprint.
4. Pick up the cover slip, holding it at the edges. While holding the cover slip at an angle, touch one edge of the cover slip to the microscope slide. Carefully lower the cover slip onto the drop of water and let go. It should now be sitting on top of the water and newsprint. You have just made a wet mount.
5. Turn the light of your microscope to the 'on' position.
6. Make sure the stage is lowered and the shortest objective lens (the lowest magnification lens) is in place.
7. Carefully pick up your slide by the edges and place it on the stage of your microscope.
8. Look through the eyepiece, place your hand on the coarse objective knob, and bring the newsprint into focus. Find the letter 'e'.
9. Adjust your slide so that the letter 'e' is in the center of your view.

The information you need to choose or to help create a complementary alternative medicine facility. Learn about emerging and traditional treatment techniques such as Ayurveda, Chinese medicine, Reiki, reflexology, prayer, homeopathy, yoga, meditation, aromatherapy, and massage. Author Robert Roush analyzes these modalities for effectiveness and argues for an evidence-based approach for their use. Complementary and Alternative Medicine is useful to consumers and hospitals or clinics considering incorporating these modalities. Complementary and Alternative Medicine works toward eliminating camps in health care seeking to establish treatment that has more to do with the patient than promoting one brand of medicine or a singular view of good health. The book presents comprehensive information on alternative medical systems, mind-body interventions, and biological-based manipulative, body-based, and energy/metaphysical therapies addressing education, licensing, and regulation needs for complementary and alternative medicine (CAM). Complementary and Alternative Medicine includes guidance on choosing modalities, discussion of industry regulation and practitioner credentialing, review of literature for CAM modalities, recommendations for clinic design and structure, recommendations for CAM industry standards for education and practice, and much more. This book addresses the for or against debate about CAM by establishing acceptable methods for combining complementary and alternative medicine modalities with conventional medicine. It is designed to be an essential resource for holistic practitioners, holistic medical doctors, AHMS nurse practitioners, holistic integrated medicine hospital programs, chiropractors, general public, medical schools, and holistic health teaching organizations.
