Elliott, F. Gresham, J.C. Witt, 2013-11-11 What do we know about behavioral analysis and intervention in educational settings Given that educational institutions were among the first to embrace the new technology of behavior change in the late 1950s and early 1960s it is apparent that we have had the opportunity to learn a great deal The evolution of the field of behavior therapy has witnessed a change in the behavior therapist from an adolescent fascination with repeatedly demonstrating the effectiveness of the new technology to a mature recognition of the complex implications of the behavioral paradigm for individuals systems and society Many facts now taken for granted were considered impossibilities a

mere two decades ago In her 1986 presidential address to Division 25 of the American Psychological Association Beth Sulzer Azaroff reviewed a number of changes in attitude in education that were strongly influenced by behavior therapy Most educators now agree that a everyone can learn b complex skills can be taught c precise general and durable performance can be taught and d barriers to learning can be overcome In addition we would add that behavior therapy is being applied to increasingly more complex human problems such as social skill deficits internalizing disorders and dysfunctional systems and organizations

[The Private Practice of Behavior Therapy](#) Sheldon J. Kaplan, 2013-03-08 Entering a full time private practice and forsaking the comforts of a regular paycheck was a difficult decision for me Fortunately I was able to begin my practice on a part time basis in space rented from two physician friends By using my behavior skills for self management and organization I was then able to help my practice grow so that with some trepidation I moved into a full time practice I have continued to maintain my practice according to the same ethical professional and business assumptions discussed in this book One of the reasons for my writing this book is that at the time I was beginning my practice there was no one text that helped me begin or to explain what nuts and bolts issues I needed to consider As my practice has grown I continued to see a need for a resource text to help the beginning therapist get started I decided to describe the assumptions methods and issues that I have used so as to present a discussion of timely issues relevant to the practice of behavior therapy
