The Context of Explanation M. Bunzl,2012-12-06 In this book Martin Bunzl considers the prospects for a general and comprehensive account of explanation given the variety of interests that prompt explanations in science Bunzl argues that any successful account of explanation must deal with two very different contexts one static and one dynamic Traditionally theories of explanation have been built for the former of these two contexts That is to say they are designed to show how it is that a finished body of scientific knowledge can be put to explanatory use But finished sciences are few and far between Real explanation also occurs in a dynamical context in which questions are asked and answers are given as theories are in the process of being constructed Here Bunzl argues that attending to explanation produced under these dynamic circumstances undermines prominent features of the theory of explanation produced in the traditional static context

Democratic Backsliding in Poland Adam Szymanski,Lukasz Zamecki,Renata Mienkowska,2023-10-24 According to various independent research institutions Poland is now seen as the fastest destabilizing democracy After 1989 Poland was often presented in the international public discourse as an example of the successful political and economic transition away from Communism However since 2015 Poland has been associated with terminologies not previously linked with this country nationalism populism or breaking rule of law The authors of the book analyze the reasons for democratic backsliding in Poland in a more comprehensive and systematic manner Special attention is paid to political polarization which is a substantial threat to democracy This volume shows the de democratization of Poland from various perspectives cultural and historical political institutions party politics and media Can the liberal model of of democracy remain intact with Poland and what role does the EU play in all of this The book should be an required reading not only for scholars and students studying democratic decline but also for everybody who wants to understand what is happening currently in Poland
