Interethnic Communication:

Interethnic Communication Young Yun Kim, 1986 Racial and ethnic strife is increasing at an alarming rate and has become a pressing social and political problem in many parts of the world. But how can we promote effective communication and cooperative relationships across ethnic boundaries? *Interethnic Communication*, the first anthology on interethnic relations which consists entirely of communication-focused studies, addresses this important question. Emphasizing interpersonal contact and interaction, this volume helps us understand how individuals and groups from a wide range of ethnic backgrounds interact with and relate to one another.

Theorizing About Intercultural Communication William B. Gudykunst, 2005 In *Theorizing About Intercultural Communication*, editor William B. Gudykunst brings together key theories that have shaped and influenced human intercultural communication. This text provides an excellent overview of the major theories currently in use and examines how these theories will also support the foundation for future research in this area. Contributors to this text include individuals who actually developed the theories covered in the book. Each contributor highlights the evolution, development, and application of the theory to provide a thorough and contemporary view of the field.

Intercultural Communication Ling Chen, 2017-04-10 This handbook takes a multi-disciplinary approach to offer a current state-of-the-art survey of intercultural communication (IC) studies. The chapters aim for conceptual comprehension, theoretical clarity, and empirical understanding with good practical implications. Attention is mostly on face-to-face communication and networked communication facilitated by digital technologies, much less on technically reproduced mass communication. Contributions cover both cross-cultural communication (implicit or explicit comparative works on communication practices across cultures) and intercultural communication works on communication involving parties of diverse cultural backgrounds. Topics include generally histories of IC research, theoretical perspectives, non-western theories, and cultural communication, specifically communication styles, emotions, interpersonal relationships, ethnocentrism, stereotypes, cultural learning, cross-cultural adaptation, and cross-border messages and particular context of conflicts, social change, aging, business, health, and new media. Although the book is prepared for graduate students and academicians, intercultural communication practitioners will also find something useful here.

Context in Interethnic Communication Anne-Kathrin Müller, 2005-04-15 Seminar paper from the year 2005 in the subject English Language and Literature Studies, Linguistics, grade 1.3, University of Duisburg-Essen, Department of English, course Context, Contextualisation and Sociolinguistics. Language: English. Abstract: Today's world becomes smaller and smaller because of the development of new transport and technology. It becomes normal to move away from one's hometown in order to find employment. Therefore, the need to communicate with people of one's own culture, family, and friends increases. Additionally, most people make use of the arising new opportunities and fly to foreign countries where we get into contact with people of other cultures. We try to stay in touch with them because technology allows for it: telephone, email, webcams, and chat make it possible for us to talk to

someone e.g. in Australia as if s/he was actually here. It becomes normal for people to learn foreign languages and to communicate with people that belong to another nation in their surrounding as well as in one's own surrounding because people come to our country in order to get to know a different people too. Today the usage of foreign media is normal for us and exchange does not stop at national borders. We feel that our need to communicate in general becomes greater and greater. Hence we have to become sensitive to other people's cultural and communicative specifics in order to enjoy the international exchange and to understand the other person in the right way. That means that we have to learn about intercultural/interethnic communication. Three complex building blocks in understanding intercultural communication can be defined and will be analysed in the first chapter: communication, culture and context. As communication and culture are interrelated and as they both interact with context, we first need to look at the former two. Context then serves as the necessary background against which intercultural communication can be understood. The development of an understanding of intercultural communication will lead to an overview of problems in interethnic conversations such as misunderstandings, stereotypes and prejudices, intercultural communication apprehension and fossilisation. This then serves as a basis for outlining methods of how miscommunication can be solved.

Interethnic Communication Ronald Scollon, Suzanne B. K. Scollon, 1980. The booklet is designed to accompany a videotape (not included here) of the same title in the series *Talking Alaska* and is intended for personal use and use in workshops and other presentations on cross-cultural and interethnic communication. The text can be used with or without the videotape. Introductory sections describe the background of the materials and offer suggestions for their classroom use, including workshop preparation, the initial session, videotape presentation and discussion, post-workshop evaluation and time considerations. The core of the text discusses basic principles of interethnic communication and related issues: the importance of communication, interethnic communication in Alaska, ethnic stereotyping, particularly in Athabaskan English, interethnic communication gatekeeping or making decisions that will affect the social, economic and geographic mobility of others, communicative styles and dealing with conflicting styles of politeness. The final section contains specific behavioral recommendations for improving interethnic communication based on three basic strategies: perception of what is happening in the communication, acceptance that others do not intend to miscommunicate, and repair of miscommunication.
