Characteristic Classes Am 76:

4-manifolds Selman Akbulut, 2016 This book presents the topology of smooth 4 manifolds in an intuitive self contained way developed over a number of years by Professor Akbulut The text is aimed at graduate students and focuses on the teaching and learning of the subject giving a direct approach to constructions and theorems which are supplemented by exercises to help the reader work through the details not covered in the proofs The book contains a hundred colour illustrations to demonstrate the ideas rather than providing long winded and potentially unclear explanations Key results have been selected that relate to the material discussed and the author has provided examples of how to analyse them with the techniques developed in earlier chapters

Research in Progress, 1971 **Complex Differential Geometry and Supermanifolds in Strings and Fields** Petrus J.M. Bongaarts, R. Martini, 1988-10-12 This volume deals with one of the most active fields of research in mathematical physics the use of geometric and topological methods in field theory The emphasis in these proceedings is on complex differential geometry in particular on Kähler manifolds supermanifolds and graded manifolds From the point of view of physics the main topics were field theory string theory and problems from elementary particle theory involving supersymmetry The lectures show a remarkable unity of approach and are considerably related to each other They should be of great value to researchers and graduate students
