Transforming Police in Central and Eastern Europe Marina Caparini,2004 The issue of police reform in countries in transition from state socialism toward more democratic forms of governance has risen to practical prominence in recent years The collapse of the Soviet Union initiated fundamental changes in aspirations ideologies and governing practices among former members of the socialist camp Reforming policing systems which had served primarily to protect the party states from their opponents into systems which serve and protect civic society has come to be seen as an essential prerequisite and concomitant of the democratisation process in transitional countries The chapters in this book describe what has happened to the policing systems in 14 countries in Central and eastern Europe what reforms in ideology organisation policies and practices have been undertaken what has changed in the way policing is done and assessment of whether the policing system has moved closer toward democratic policing In combining descriptions of reforms and assessments of whether reforms have moved policing systems toward more democratic forms the book provides a comparative overview of what has been achieved since 1989 and what has been learned so far about how to reform policing systems along democratic lines Such lessons offer insights for further reform in transitional countries and for Western democracies as well and we hope will stimulate more theoretical discussions of the nature and dynamics of policing systems state society relations and the role of processes of democratisation of policing systems     **The Police Against Itself** Kevin Gerard Karpiak,2009     *German Politics and Society* ,2002     *Berlin Identities* Susanne Helene Hoelscher-Whiting,2005

Kalantary,2005      **Political Epistemics** Andreas Glaeser,2011-04-15 What does the durability of political institutions have to do with how actors form knowledge about them Andreas Glaeser investigates this question in the context of a fascinating historical case socialist East Germany s unexpected self dissolution in 1989 His analysis builds on extensive in depth interviews with former secret police officers and the dissidents they tried to control as well as research into the documents both groups produced In particular Glaeser analyzes how these two opposing factions understanding of the socialist project came to change in response to countless everyday experiences These investigations culminate in answers to two questions why did the officers not defend socialism by force And how was the formation of dissident understandings possible in a state that monopolized mass communication and group formation He also explores why the Stasi although always well informed about dissident activities never developed a realistic understanding of the phenomenon of dissidence Out of this ambitious study Glaeser extracts two distinct lines of thought On the one hand he offers an epistemic account of socialism s failure that differs markedly from existing explanations On the other hand he develops a theory a sociology of understanding that shows us how knowledge can appear validated while it is at the same time completely misleading
