## **Distributed Applications And Interoperable Systems:**

**Distributed Applications and Interoperable Systems** Hartmut König, Kurt Geihs, Thomas Preuss, 1997-09-30

Distribution and interoperability in heterogeneous computing environments are the key requirements for state of the art information processing systems Distributed applications are making a critical contribution in many application sectors such as office automation finance manufacturing telecommunications aerospace and transportation Users demand support for the construction integration and management of their application systems as well as for the interoperability of independent application components DAIS 97 provides a forum for researchers application designers and users to review discuss and learn about new approaches and concepts in the fields of distributed applications DAIS 97 will especially focus on the interoperability between different applications and services different implementations of the same and of different distributed platforms

**New Developments in Distributed Applications and Interoperable Systems** Zielinski, Kurt Geihs, Aleksander Laurentowski, 2001-08-31 Distributed applications are a necessity in most central application sectors of the contemporary information society including e commerce e banking e learning e health telecommunication and transportation This results from a tremendous growth of the role that the Internet plays in business administration and our everyday activities This trend is going to be even further expanded in the context of advances in broadband wireless communication New Developments in Distributed Applications and Interoperable Systems focuses on the techniques available or under development with the goal to ease the burden of constructing reliable and maintainable interoperable information systems providing services in the global communicating environment The topics covered in this book include Context aware applications Integration and interoperability of distributed systems Software architectures and services for open distributed systems Management security and quality of service issues in distributed systems Software agents and mobility Internet and other related problem areas The book contains the proceedings of the Third International Working Conference on Distributed Applications and Interoperable Systems DAIS 2001 which was held in September 2001 in Krak w Poland and sponsored by the International Federation on Information Processing IFIP The conference program presents the state of the art in research concerning distributed and interoperable systems This is a topical research area where much activity is currently in progress Interesting new aspects and innovative contributions are still arising regularly The DAIS series of conferences is one of the main international forums where these important findings are reported
