Divine Powers:

Divine Powers in Late Antiquity Anna Marmodoro, Irini-Fotini Viltanioti, 2017-01-26 Is power the essence of divinity or are divine powers distinct from divine essence Are they divine hypostases or are they divine attributes Are powers such as omnipotence omniscience etc modes of divine activity How do they manifest In which way can we apprehend them Is there a multiplicity of gods whose powers fill the cosmos or is there only one God from whom all powers derive and whose powers permeate everything These are questions that become central to philosophical and theological debates in Late Antiquity roughly corresponding to the period 2nd to the 6th centuries On the one hand the Pagan Neoplatonic thinkers of this era postulate a complex hierarchy of gods whose powers express the unlimited power of the ineffable One On the other hand Christians proclaim the existence of only one God one divine power or one Lord of all powers Divided into two main sections the first part of *Divine Powers in Late Antiquity* examines aspects of the notion of divine power as developed by the four major figures of Neoplatonism Plotinus c 204 270 Porphyry c 234 305 Iamblichus c 245 325 and Proclus 412 485 It focuses on an aspect of the notion of divine power that has been so far relatively neglected in the literature Part two investigates the notion of divine power in early Christian authors from the New Testament to the Alexandrian school Clement of Alexandria Origen Athanasius the Great and further to the Cappadocian Fathers Basil the Great Gregory of Nyssa as well as in some of these authors sources the Septuagint Philo of Alexandria The traditional view tends to overlook the fact that the Bible particularly the New Testament was at least as important as Platonic philosophical texts in the shaping of the early Christian thinking about the Church's doctrines Whilst challenging the received interpretation by redressing the balance between the Bible and Greek philosophical texts the essays in the second section of this book nevertheless argue for the philosophical value of early Christian reflections on the notion of divine power The two groups of thinkers that each of the sections deal with the Platonic Pagan and the Christian one share largely the same intellectual and cultural heritage they are concerned with the same fundamental questions and they often engage in more or less public philosophical and theological dialogue directly influencing one another

God and Necessity Brian Leftow, 2012-09-06 Brian Leftow offers a theory of the possible and the necessary in which God plays the chief role and a new sort of argument for God's existence It has become usual to say that a proposition is possible just in case it is true in some possible world roughly some complete history a universe might have and necessary just if it is true in all Thus much discussion of possibility and necessity since the 1960s has focussed on the nature and existence or not of possible worlds *God and Necessity* holds that there are no such things nor any sort of abstract entity It assigns the metaphysical work such items usually do to God and events in God's mind and reduces broadly logical modalities to causal modalities replacing possible worlds in the semantics of modal logic with God and His mental events Leftow argues that theists are committed to theist modal theories and that the merits of a theist modal theory provide an argument for God's existence Historically almost all theist modal theories base all necessary truth on God's nature Leftow

disagrees he argues that necessary truths about possible creatures and kinds of creatures are due ultimately to God's unconstrained imagination and choice On his theory it is in no sense part of the nature of God that normal zebras have stripes if that is a necessary truth Stripy zebras are simply things God thought up and they have the nature they do simply because that is how God thought of them Thus Leftow's essay in metaphysics takes a half step toward Descartes view of modal truth and presents a compelling theist theory of necessity and possibility

Neo-Aristotelian Metaphysics and the Theology of Nature William M.R. Simpson, Robert C. Koons, James Orr, 2021-10-10 This book explores the relationship between a scientifically updated Aristotelian philosophy of nature and a scientifically engaged theology of nature It features original contributions by some of the best scholars engaging with Aristotelianism in contemporary metaphysics philosophy of science and philosophical theology Despite the growing interest in Aristotelian approaches to contemporary philosophy of science few metaphysicians have engaged directly with the question of how a neo Aristotelian metaphysics of nature might change the landscape for theological discussion concerning theology and naturalism the place of human beings within nature or the problem of divine causality The chapters in this volume are collected into three thematic sections Naturalism and Nature Mind and Nature and God and Nature By pushing the current boundaries of neo Aristotelian metaphysics to recover the traditional notion of substantial forms in physics reframe the principle of proportionality in biology and restore the hierarchy of being familiar to ancient philosophy this book advances a metaphysically unified framework that accommodates both scientific and theological knowledge enriching the interaction between science philosophy and theology Neo Aristotelian Metaphysics and the Theology of Nature will be of interest to scholars and advanced students working in metaphysics philosophy of science natural theology philosophical theology and analytic theology Chapters 1 2 and 7 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
