Anxiety Epidemic:

The Anxiety Epidemic Graham Davey, 2021-02-02 Are we living in an age of unprecedented anxiety or has this always been a problem throughout history We only need look around us to see anxieties in the family home the workplace on social media and especially in the news It s true that everyone feels anxious at some time in their lives but we re told we re all feeling more anxious than we ve ever been before and for longer than we ve ever done before It s even reported that anxiety is a modern epidemic significant enough to challenge the dominance of depression as the most common mental health problem Much of this increase has been attributed to changes in lifestyles that have led to more stress and pressure being placed on people from childhood to adolescence to adulthood But that s a big claim Going back over the generations how anxious were people in 1968 or 1818 Are people just anxious all the time regardless of what they do or when they lived Is anxiety an inevitable consequence of simply being alive Graham Davey addresses many important questions about the role of anxiety What is it good for What are the unique modern day causes of our anxieties and stresses What turns normal everyday anxiety into the disabling disorders that many of us experience distressing and debilitating conditions such as phobias social anxiety panic disorder obsessive compulsive disorder pathological worrying and post traumatic stress disorder To truly conquer anxiety we need to understand why it has established its prominent place in our modern world Graham Davey is Emeritus Professor of Psychology at the University of Sussex His research interests extend across mental health problems generally and anxiety and worry specifically He is a former president of the British Psychological Society and is currently editor in chief of the Journal of Experimental Psychopathology which publishes cutting edge research on anxiety and anxiety related problems

Recovering the Voice in Our Techno-Social World Deborah Eicher-Catt, 2020-02-18 Using a communicological perspective Recovering the Voice in our Techno Social World On the Phone identifies voice phone in Greek as the essential medium for a re-enchantment of human communication in our highly impersonal techno social environment This book is a response to the growing concern by social critics that we are becoming a de-voiced society because of our preferences for hyper-textual image based forms of electronic connectivity Ironically while we are increasingly on the phone we are sacrificing our vocalicity within immediate ear to ear relations Framed by the trope of enchantment Deborah Eicher Catt argues that the immediacy of the sounding voice calls us and enchants us to make possible productive moments of resonance in which we might cultivate an interpersonal resilience in today's fast-paced media saturated environment

Scholars of media studies communication and sociology will find this book particularly useful

The Inner Level Richard G. Wilkinson, Kate Pickett, 2019 Why are people more relaxed and at ease with each other in some countries than others Why do we worry so much about what others think of us and often feel social life is a stressful performance Why is mental illness three times as common in the USA as in Germany Why is the American dream more of a reality in Denmark than the USA What makes child well-being so much worse in some countries than others As The Inner Level demonstrates the answer to all these is inequality Wilkinson and Pickett describe how these responses to hierarchies evolved and why the impacts of inequality on us are so severe In doing so they challenge the conception that humans are inescapably competitive and self-interested They undermine too the idea that inequality is the product of natural differences in individual ability This book draws together many of the most urgent problems facing societies today but it is not just an index of our ills It demonstrates
