

## Significant changes to *Annals of Applied Biology* from 2025

We start 2025 looking forward to a number of changes that are being introduced since the second part of 2024, with a few more to come within the next few months. As a matter of fact, 2024 was a year in which many decisions were made in order to introduce changes to the *Annals of Applied Biology*, always looking for a more interesting format, style, and ways to make the submission and the reviewing processes more friendly, quick and efficient.

The first change is that *Annals* has been rebranded with a new strapline of 'Biosciences for Sustainability'. If you want to know more about it, read the Parry and Azevedo (2025) Editorial (<https://onlinelibrary.wiley.com/doi/10.1111/aab.12952>), published jointly in this January issue of 2025. There is actually quite a lot more information in the editorial about conferences/events and special issues.

Wiley (<https://www.wiley.com/en-us>) has launched a new platform that will replace ScholarOne. In 2025, this new platform will be used by the editorial board for processing and editing all submissions to the journal. Our editors will have the opportunity to be trained and get used to it. It is important to remember that in 2023, the Research Exchange submission portal (ReX, <https://onlinelibrary.wiley.com/page/journal/17447348/homepage/forauthors.html>) Wiley online submission platform was launched; some adjustments have been made, and it seems to be working nicely.

Perhaps the most significant change is related to the structure of the Editorial Board. Discussions among the Association of Applied Biology (AAB – <https://www.aab.org.uk>) Council, Editors and Wiley have taken place during 2024, and a new editorial board structure and the way it works should be implemented during the first quarter of 2025. *Annals* currently has an Editor-in-Chief (EIC), who is also a Senior Editor (SE), a group of Senior Editors for selected subject areas, and a large number of Associate Editors (AEs) covering the wide range of subjects/ areas published by *Annals*. We noticed that, in many cases, the time taken from manuscript submission, assigning the manuscript to a SE, then to an AE and only then to the reviewers, was far too long and caused delays and even communication issues. Hopefully, the new structure will be more efficient and allow faster manuscript handling and sending decisions to the authors. We truly appreciate the help, dedication and commitment of all editors currently on the Board of *Annals*.

I must also inform that I am completing my term as EIC on the 31st of December 2025. I have decided to step down and retire from my editorial activities, but I will stay on as SE for 1 extra year (2026) during the transition period and implementation of the new structure of the editorial board. I am actually retiring from research. Therefore, very soon AAB will be selecting a new person for the EIC position from January 2026.

Further changes will be implemented during 2025, and they will be presented to our readers in the *Annals'* website.

In a way, all these changes introduced to the editorial board structure, the Wiley Publication workflow (in brief: Article acceptance – Export to Production – Copy editing and layout – Proofing – Online publication) and others planned for 2025, will ensure a much better experience for the authors with rapid publication, and keeping the quality of the entire process at its highest.

Another aspect that was very important in 2024 was that the SEs, the AAB office and Wiley (several teams) maintained a much closer contact with the quarterly catch-up periodic meetings and a tremendous support of the Wiley's marketing team. The latter should have a major impact in the coming months since we have been working very closely to find ways and using the Wiley tools to market the journal and the articles, so they gain more visibility. I am sure the authors will appreciate this extra effort to market their work through a number of platforms available to us.

I also would like to remind you of some of the special issues that will be published from 2025 onwards. *Annals* has flexible deadlines for each of these special issues, so please contact myself or Geraint Parry if you intend to submit but that the submission of the manuscript might be delayed.

- Advances in Potato Cyst Nematode Management. Deadline December 31st 2024. <https://onlinelibrary.wiley.com/page/journal/17447348/homepage/call-for-papers/si-2024-000635>
- Biomass and Energy Crops. Deadline December 31st 2024. <https://onlinelibrary.wiley.com/page/journal/17447348/homepage/call-for-papers/si-2024-000632>
- Agricultural Biotechnology in the Era of Genome Editing. Deadline 1st March 2025. <https://onlinelibrary.wiley.com/page/journal/17447348/homepage/call-for-papers/si-2024-000708>

When it comes to special issues, I would like to mention our Volume 185, Issue 2 (<https://onlinelibrary.wiley.com/doi/10.1111/aab.12953>), which is a "Tribute to Simon Leather", our former SE and EIC. The issue has 12 research papers on Entomology and an Editorial on the work and life of Prof. Simon Leather (Azevedo et al., 2024), a Forum paper, a Review paper and an Opinion paper, all very exciting and obviously related to the field of entomology.

We are also beginning the year with an Interview article with Professor Fernanda Fidalgo, Faculty of Sciences, University of Porto, Portugal (Azevedo, 2025 – <https://onlinelibrary.wiley.com/doi/10.1111/aab.12953>). Please, don't miss it!
