Ethical and Moral Issues Relating to Animals John Timothy Allen,1993 [Animal Ethics in Context](#) Clare Palmer,2010 It is widely agreed that because animals feel pain we should not make them suffer gratuitously Some ethical theories go even further because of the capacities that they possess animals have the right not to be harmed or killed These views concern what not to do to animals but we also face questions about when we should and should not assist animals that are hungry or distressed Should we feed a starving stray kitten And if so does this commit us if we are to be consistent to feeding wild animals during a hard winter In this controversial book Clare Palmer advances a theory that claims with respect to assisting animals that what is owed to one is not necessarily owed to all even if animals share similar psychological capacities Context history and relation can be critical ethical factors If animals live independently in the wild their fate is not any of our moral business Yet if humans create dependent animals or destroy their habitats we may have a responsibility to assist them Such arguments are familiar in human cases we think that parents have special obligations to their children for example or that some groups owe reparations to others Palmer develops such relational concerns in the context of wild animals domesticated animals and urban scavengers arguing that different contexts can create different moral relationships

Ethical and Moral Issues Relating to Animals Janice C. Swanson,1992 **Animal Ethics in the Wild** Catia Faria,2022-12-22 Animals like humans suffer and die from natural causes This is particularly true of animals living in the wild given their high exposure to and low capacity to cope with harmful natural processes Most wild animals likely have short lives full of suffering usually ending in terrible deaths This book argues that on the assumption that we have reasons to assist others in need we should intervene in nature to prevent or reduce the harms wild animals suffer provided that it is feasible and that the expected result is positive overall It is of the utmost importance that academics from different disciplines as well as animal advocates begin to confront this issue The more people are concerned with wild animal suffering the more probable it is that safe and effective solutions to the plight of wild animals will be implemented in the future

prelude et rag for flute and piano p proust just flutes - Feb 09 2023
