revisiting crucial choices people made in history and examining the consequences of those choices for them and for us It demonstrates a method of teaching history that recreates events as people experienced them and asks important questions that troubled them but that rarely appear in conventional textbooks Unlike conventional methods that often reduce history to names dates and factoids for students to memorize it is a method that brings past debates to life the losers as well as the winners points of view and makes the subject exciting In studying history as choice students examine the problems people faced their options for solving them their decision making processes and the choices they made Then students evaluate the consequences of those choices both for people in the past and us today They explore what might have happened if different choices had been made Finally students relate the consequences of those past choices to problems we face today and the choices we need to make History as choice is a practical and practicable method It has been designed to satisfy the curriculum goals of the National Council for the Social Studies and the book explains how it can be used to satisfy any state or local curriculum standards The book also identifies and illustrates resources that can be used with this method from data bases to popular music and explains how teachers can gradually integrate it into their courses In the first part of the book the method of history as choice is explained using the question of whether the American Revolution was a mistake as a case in point The second part of the book explores thirteen other questions about significant issues and events in American history as additional examples of how one might teach history as choice
