Make Learning Personal Barbara Bray,Kathleen McClaskey,2014-10-10 Put learning back into the hands of the learner Personalized learning empowers learners to take control of their own learning This resource draws on Universal Design for Learning principles to create a powerful shift in classroom dynamics by developing self directed self motivated learners You ll discover A system that reduces barriers and maximizes learning for all learners An explanation distinguishing personalization from differentiation and individualization The Stages of Personalized Learning Environments that transform teacher and learner roles Background information to build a rationale on why to personalize learning Strategies around the culture shift in classrooms and schools as you personalize learning As recognized authorities the authors have led educational innovation for almost three decades

Handbook of Personalized Learning Matthew L. Bernacki,Candace Walkington,Alyssa Emery,Ling Zhang,2025-11-27 The Handbook of Personalized Learning offers a theoretically grounded conceptualization for the development and implementation of personalizing learning This comprehensive volume addresses personalized learning s roots in educational cognitive and social psychological studies of learning as well as in practice Positioned to shape the future of personalized learning this handbook documents past innovations achieved in educational technology research and development considers how advancements in learning analytics and machine learning have influenced policy and implementation and showcases current and future applications of personalized learning in diverse K 12 classrooms higher education and informal educational settings The book s varied rigorous contributions are informed by an overarching model of personalized learning that centers the assets individuals bring to learning opportunities including their prior knowledge interests self beliefs autonomy and identity and whose responsive designs build on those assets to improve learning and attainment Researchers developers teaching faculty and graduate students across educational psychology educational technology the learning sciences learning analytics human computer interaction and beyond will come away with substantive foundations and cutting edge exemplars of the ways in which designs can be personalized to promote learners experiences in educational settings

Learning Personalized Allison Zmuda,Greg Curtis,Diane Ullman,2015-02-10 A real world action plan for educators to create personalized learning experiences Learning Personalized The Evolution of the Contemporary Classroom provides teachers administrators and educational leaders with a clear and practical guide to personalized learning Written by respected teachers and leading educational consultants Allison Zmuda Greg Curtis and Diane Ullman this comprehensive resource explores what

personalized learning looks like how it changes the roles and responsibilities of every stakeholder and why it inspires innovation. The authors explain that in order to create highly effective personalized learning experiences a new instructional design is required that is based loosely on the traditional model of apprenticeship learning by doing. Learning Personalized challenges educators to rethink the fundamental principles of schooling that honors students' natural willingness to play, problem solve, fail, re-imagine, and share. This groundbreaking resource explores the elements of personalized learning and offers a framework to achieve it. Provides a roadmap for enrolling relevant stakeholders to create a personalized learning vision and reimagine new roles and responsibilities. Addresses needs and provides guidance specific to the job descriptions of various types of educators, administrators, and other staff. This invaluable educational resource explores a simple framework for personalized learning: co-creation, feedback, sharing, and learning that is as powerful for a teacher to re-examine classroom practice as it is for a curriculum director to re-examine the structure of courses.

Literature Reviews in Support of the Middle Level Education Research Agenda Steven B. Mertens, Micki M. Caskey, 2018-03-29. This volume covers the 8 areas identified by the Middle Level Education Research Special Interest Group to guide middle grades education research: They are young adolescent development, cultural responsiveness, special populations, educator development, curriculum, social and emotional learning, digital technologies, and school structures.

Personalizing the High School Experience for Each Student Joseph DiMartino, John H. Clarke, 2008-04-21. Why is it that so many students see high school as a prison sentence to be endured rather than a time to learn and grow? According to DiMartino and Clark, many high school students feel invisible and isolated. They don't see the relevance of what they are being taught, and they don't see how their classes are preparing them for success as adults. This book offers a new vision for high schools: a vision that puts students at the center of their learning. Personalized high schools engage students by allowing them to plan and develop their own pathways through school based on their talents, interests, and aspirations. The book describes six promising practices that are emerging in high schools: Guided Personalized Learning: Teachers act as advisors to small groups of students over two to six years to review personal learning plans, assist in course selection, and discover opportunities in the community. Personal Learning Plans: Students meet regularly with parents, advisors, mentors, and peers to review progress and plan next steps. Personalized Teaching: Teachers differentiate instruction to allow students to explore different aspects of the subject and produce authentic work that shows their understanding. Community Based Learning: Active involvement in the community helps clarify a student's purpose and defines the steps necessary to achieve successful adult roles. Personalized Assessment: Rather than grades and tests, scores, the work itself, portfolios, exhibitions, and student-led conferences show what the students have learned. Personalizing school systems: Some schools are moving past the Carnegie unit and focusing instead on helping each student achieve specified competencies often through learning experiences that the students themselves have helped design. These six practices can improve learning for all students by engaging them in shaping their own high school experience and discovering how the
