Reproductive Behavior Henry P. David, 2013-12-11 **Current Catalog** National Library of Medicine (U.S.), 1982 First multi year cumulation covers six years 1965 70 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1982 Second-Trimester Abortion G. Berger, W.E. Brenner, L.G. Keith, 2012-12-06 Irvin M Cushner MD MPH It is both remarkable and at the same time a sign of this era of rapid change that one can refer back to the infancy of a field which has existed for barely more than a decade Yet one now reads of the maturing of the family planning and abortion fields both of which were incorporated into our society and integrated into our health care system within the past ten years Indeed in the very year that this book is being prepared we note the tenth anniversaries of several significant events of 1970 1 the enactment of Title X of the Public Health Service Act establishing a Federal program in family planning 2 the first issuance by a major health related organization the APHA of a policy statement advocating repeal of all abortion laws and 3 the enactment by New York State of an abortion law whose only restriction was that it be performed by a licensed physician and the subsequent action the first by any local health department New York City to assure both its implementation and its quality They were indeed eventful days These three events seemed to presage a then unprecedented acceptance of fertility regulation as a right and as a needed service **Abortion** Ruth Porter, Maeve O'Connor, 2009-09-14 The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia in which groups of leading scientists from a range of topics across biology chemistry and medicine assembled to present papers and discuss results The Novartis Foundation originally known as the Ciba Foundation is well known to scientists and clinicians around the world **Constitutional Amendments Relating to Abortion** United States. Congress. Senate. Committee on the Judiciary. Subcommittee on the Constitution, 1983 Abortion in the Developing World Axel Mundigo, Cynthia Indriso, 1999-02 Twenty million unsafe abortions are performed each year 90% of which occur in the developing world In many countries abortion is still illegal in others a variety of cultural barriers force women to seek out underground abortions Even in countries such as China where abortion is fully accessible in practice as well as in theory our understanding of the phenomenon is very partial In discussing issues that are of the utmost important for understanding abortion this book furthers our knowledge of this one of the most important elements of reproductive health The result of a global research project commissioned by the World Health Organization the book provides new information on abortion vital for both policy debate and strategies for intervention The contributors explain the extent of abortion why it happens and what happens when it does A section on women s perspectives explains how women across the world feel when they find they must abort the processes by which they go about it how the underground networks operate and the obstacles these women must face The book addresses providers views on abortion highlighting how their personal values and opinions influence the total experience that women undergo

Several contributions discuss the relationship between contraception and abortion while a section on adolescents addresses a newly emerging concern for programme managers around the world With more information that has ever been previously available this book is the most comprehensive and up to date picture of abortion globally it also demonstrates that true reproductive freedom comes only with women s empowerment and with an acceptable quality of health care It will be necessary reading for students and academics of women s studies and population studies as well as for practitioners in the health sector
