Abdication Or All Is True:

Abdication of the Sovereign Self Andrew Spano,2019-01-22 Language and logic are inextricably commingled in our everyday speech What we say particularly in the form of statements tends not only to mirror our world but mold it into our own image This book looks at how much of our verbal communication can be considered valid from the point of view of the rules of logic Are we saying what we mean to say Is what we hear from the media our peers our leaders and those who determine the narrative story of our lives meaningful rational and logical Even more important than the answers to these questions is the answer to whether we are the governors and rulers of our own lives Have we abdicated this sovereign rule to forces that may not have our best interests and wellbeing in mind Using works of Continental and analytic philosophy ancient and modern psychology linguistics religion and literature this book supports the thesis that we have surrendered the only thing we could ever possibly own ourselves for unprecedented access to consumer goods credit and the hope for medical immortality Further the argument is made that the prevailing discourse of global modern culture consists of statements which are invalid because their inner semantic structure is inherently contradictory The argument is aimed at those who want to learn more about what makes our everyday discourse and thinking rational or irrational At the same time it indicts the individual of the modern industrialized state for the crime of the voluntary abdication of his sovereignty and for forcing others who have little control over their lives to do the same This book is a call for introspection in the hope that the reader will see something of the situation described reflected not only in himself but in the society he inhabits **Abdication**
