Stewardship F Stuart Chapin III,2020-06-03 In a society more concerned with how to cope with existential dread than how to make actionable changes to save the planet a surprisingly large number of Americans identify as environmentalists What can individual people do to lessen human impacts on the planet This is not an easy question Most research is focused on large scale changes that go beyond anything an individual can accomplish and people are left feeling defeated rather than inspired to make changes in their everyday lives Change starts at home and F Stuart Chapin III has assembled a book for people who want to learn more about global changes and more importantly what they can do about them starting today Grassroots Stewardship approaches our current situation with an educated sense of hope and positivity This book

A Green and Permanent Land Randal S. Beeman, James

A. Pritchard, 2001 Once patronized primarily by the counterculture and the health food establishment the organic food

industry today is a multi billion dollar business driven by ever growing consumer demand for safe food and greater public

awareness of ecological issues Assumed by many to be a recent phenomenon that industry owes much to agricultural

innovations that go back to the Dust Bowl era This book explores the roots and branches of alternative agricultural ideas in

twentieth century America showing how ecological thought has challenged and changed agricultural theory practice and

policy from the 1930s to the present It introduces us to the people and institutions who forged alternatives to industrialized

agriculture through a deep concern for the enduring fertility of the soil a passionate commitment to human health and a

strong advocacy of economic justice for farmers Randal Beeman and James Pritchard show that agricultural issues were

central to the rise of the environmental movement in the United States As family farms failed during the Depression a new

kind of agriculture was championed based on the holistic approach taught by the emerging science of ecology Ecology

influenced the permanent agriculture movement that advocated such radical concepts as long term land use planning

comprehensive soil conservation and organic farming Then in the 1970s sustainable agriculture combined many of these

ideas with new concerns about misguided technology and an over consumptive culture to preach a more sensible approach to

farming In chronicling the overlooked history of alternative agriculture *A Green and Permanent Land* records the significant

contributions of individuals like Rex Tugwell Hugh Bennett Louis Bromfield Edward Faulkner Russell and Kate Lord Scott

and Helen Nearing Robert Rodale Wes Jackson and groups like Friends of the Land and the Practical Farmers of Iowa And by

demonstrating how agriculture also remains central to the public interest especially in the face of climatic crises genetically

altered crops and questionable uses of pesticides this book puts these issues in historical perspective and offers readers

considerable food for thought
