

# Architects Of Light

**Guillaume Favre**

## **Architects Of Light:**

**The Architecture of Light** Mary Ann Steane, 2011 Reviewing the use of natural light by architects in the era of electricity this book aims to show that natural light not only remains a potential source of order in architecture but that natural lighting strategies impose a usefully creative discipline on design Considering an approach to environmental context that sees light as a critical aspect of place this book explores current attitudes to natural light by offering a series of in depth studies of recent projects and the particular lighting issues they have addressed It gives a more nuanced appraisal of these lighting strategies by setting them within their broader topographic climatic and cultural contexts Made of Light Mark Major, 2005-01-01 Made of Light the Art of Light and Architecture explores our illuminated world in a way that is both affecting and thought provoking Rather than addressing quantitative criteria this book deliberately focuses on qualitative ephemeral and abstract considerations and shows them to be an essential part of the relationship between light and built form Made of Light is not intended to prescribe an approach rather it attempts to recognise that while we have our own individual subjective perception of light there is also a dialogue to be had through which this most exciting but elusive medium might be explored Jonathan Speirs and Mark Major was well established authorities on light Taking their cues from the natural world their approach at the forefront of lighting design is both invigorating and inspirational Edited by Anthony Tischhauser this book includes an interview with both architects as well as vivid illustrations of their personal approach to an architecture that is Made of Light BOOK JACKET **Architectural Lighting** Hervé Descottes, Cecilia E. Ramos, 2013-07-02 Architectural Lighting the latest addition to the Architecture Briefs series provides both a critical approach to and a conceptual framework for understanding the application of lighting in the built environment The key considerations of lighting design are illuminated through accessible texts and instructional diagrams Six built projects provide readers with concrete examples of the ways in which these principles are applied Short essays by architect Steven Holl artist Sylvain Dubuisson and landscape architect James Corner explore the role of lighting in defining spatial compositions The Architecture of Natural Light Henry Plummer, 2009 Seen through the eyes of an architect photographer The Architecture of Natural Light is the first publication to consider the many effects of natural illumination in contemporary buildings This comprehensive and thoughtful survey begins with a brief introduction to the history of architecture seen through the advances and experimentation put forward by architects over the centuries For all those seeking to or interested in creating space that transcends the physical The Architecture of Natural Light is a powerful and poetic yet practical survey that provides an original and timeless approach to contemporary architecture Designing With Light and Shadow Kaoru Mende, Lighting Planners Associates Inc, 2000 In the past the focus of urban illumination has been purely functional Designing with Light and Shadow however is a treatise on the work of Kaoru Mende Lighting Planners Associates a Japanese firm which purposely creates spaces to leave a lasting **Light and Air: a Text-book for Architects and Surveyors**

Banister Fletcher, 1886      **Light in Engineering, Architecture and the Environment** Konrad Domke, C. A. Brebbia, 2011  
The Wessex Institute of Technology has for years been convening conferences on sustainable architecture and planning design in nature heritage architecture and environmental health With the growing importance of lighting in the creation of better healthier environments the enhancement of heritage architecture and the recovery of urban areas as well as new developments in more sustainable lighting it became clear that a conference focusing on lighting issues would be useful This book contains the papers to be presented at the first International Conference on Lighting in Engineering Architecture and the Environment discussing the latest developments in a variety of topics related to light and illumination from its engineering aspects to its use in art and architecture and the effect of light on living systems and human health Ranging from discussions of technical issues regarding equipment design and light measurement to human perception of light and the effect of light on human health the book will be of interest to architectures planners environmental health experts and stage designers in academia industry and government as well as colleagues discussing the latest developments in a variety of topics related to light and illumination from its engineering aspects to its use in art and architecture and the effect of light on living systems and human health

**Architects' Data** Ernst Neufert, 2023-08-28 An indispensable tool for the initial stages of designing and planning a building project This new edition of the classic bestselling text provides in one concise volume the essential information needed as the basis for the more detailed design and development of any building project Organized largely by building type it covers the planning criteria and considerations of function and location and with over 6200 diagrams it provides a mass of data on spatial requirements Most of the featured illustrations are dimensioned and each building type includes plans sections site layouts and design details The book also includes an extensive bibliography and detailed set of metric imperial conversion tables Architects Data 6th Edition starts with the basics of designing for a new building project before moving on to covering everything an architect needs to know It also looks at the design styles and specifications for creating different types of structures such as those made for residential commercial religious cultural sports medical and other types of occupation Sixth English edition of the classic international reference for architects Covers user requirements planning criteria basic dimensions and considerations of function and siting Includes numerous examples and over 6200 illustrations and tables New in the Sixth Edition Updated sections on lighting stairs and lifts energy performance certificates and fire protection New sections on electric charging stations beekeeping and newsrooms and tiny houses Additional sections on sustainable building materials added to relevant chapters Architects Data is an excellent resource for architects building surveyors space planners and design and building contractors everywhere

**Masters of Light** Peter Hyatt, The Images Publishing Group, 2007 A new book by Peter and Jenny Hyatt Light is the primary language of architecture It gives form power and nuance Masters of Light considers the world's greatest living exponents of design where light is paramount

*Illuminating* Michelle Corrodi, Klaus Spechtenhauser, 2014-03-12 The image of open working

and living spaces flooded with light has more than any other become fixed in our minds as a symbol of modernity and the spirit of the times While the workplace has always been the focus of ergonomic studies and optimization with respect to a good provision of daylight large glass surfaces have now become the order of the day for living spaces as well But does this automatically make for better illumination Taking this question as its starting point the publication *Illuminating* thematizes central aspects of light planning including the connection between the provision of daylight and architectural design building orientation the nature of the facade the ground plan comfort and the proportions and atmosphere of rooms In the process general characteristics and fundamental principles as well as subtle facets of an intelligent treatment of daylight are discussed and critically examined within an expanded architecture and culture historical context

**Architecture & Sustainable Development (vol.1)** Magali Bodart,Arnaud Evrard,2011-07 This book of Proceedings presents the latest thinking and research in the rapidly evolving world of architecture and sustainable development through 255 selected papers by authors coming from over 60 countries

*Architects of Light* Sharon Shane,2004-01-01

**Electric Light** Sandy Isenstadt,2018-09-25 How electric light created new spaces that transformed the built environment and the perception of modern architecture In this book Sandy Isenstadt examines electric light as a form of architecture as a new uniquely modern kind of building material Electric light was more than just a novel way of brightening a room or illuminating a streetscape it brought with it new ways of perceiving and experiencing space itself If modernity can be characterized by rapid incessant change and modernism as the creative response to such change Isenstadt argues then electricity instantaneous malleable ubiquitous evanescent is modernity s medium Isenstadt shows how the introduction of electric lighting at the end of the nineteenth century created new architectural spaces that altered and sometimes eclipsed previously existing spaces He constructs an architectural history of these new spaces through five examples ranging from the tangible miracle of the light switch to the immaterial and borderless gloom of the wartime blackout He describes what it means when an ordinary person can play God by flipping a switch when the roving cone of automobile headlights places driver and passenger at the vertex of a luminous cavity when lighting in factories is seen to enhance productivity when Times Square became an emblem of illuminated commercial speech and when the absence of electric light in a blackout produced a new type of space In this book the first sustained examination of the spatial effects of electric lighting Isenstadt reconceives modernism in architecture to account for the new perceptual conditions and visual habits that followed widespread electrification

[Light: The Shape of Space](#) Lou Michel,1995-10-27 *Light The Shape of Space Designing with Space and Light* Lou Michel Every design professional who touches a space shapes the light and the feeling of that space Architect lighting engineer interior designer lighting or home furnishing manufacturer each contributes an aesthetic layer sometimes yielding unexpected results All too often the best laid plans of one professional are unintentionally subverted by another Removing surprises and guess work from design Lou Michel honored architectural lighting educator has created *Light The Shape of Space* showing how to design

with the effects of light rather than light itself The book is a revolutionary resource for all design professionals and manufacturers of surfacing materials Drawing on over fifteen years experience of research and teaching in the architectural Space and Light Laboratory at The University of Kansas Michel masterfully examines the interrelationship of lighting and the design of architectural space as perceived not in architectural photos or paint chips and fabric swatches but by human vision the gateway to emotional response The book was written for professionals who care about how people feel in the spaces they design and focuses on the humanization of architecture Taking a non stylistic approach to design Michel analyzes architecture from the perspective of how the users see their surroundings as they move through space The reader will learn what pleases and what disturbs people based on how the human visual system responds to color texture pattern and brightness The book features principles of design for the student and professional and is generously supported by illustrations and research Michel also provides a method for evaluating the visual effectiveness of building materials and lighting systems including those that will appear on the market long after this book is dog eared Michel unveils a groundbreaking luminance brightness rating system LBR and a nine zone brightness scale to aid designers in previsualizing the appearance of surfacing materials at every stage of the design process from schematics to development to refinement Among the topics treated are the interaction of lighting and spatial design color theory for space and light the luminance relationships between free standing objects and the surrounding spatial boundaries against which they are seen the appearance of building materials in color and brightness when modified by light and spatial location lighting spatial connections including the perception of rooms adjacent to the observer lighting and perception of spaces screened by architectural grilles creating lighted space Designing with the effects of light is both an art and a science No other book on the market bridges that gap as successfully as *Light The Shape of Space Architecture* ,1904 [Architectural Rendering with 3ds Max and V-Ray](#) Markus Kuhlo,2013-03-20 Create high quality photorealistic renders of architectural visualizations using 3ds Max and Vray with the project based tutorials in this book Learn how to combine lighting and rendering options to end up with the most realistic final renders possible at a professional level The tutorials in this book are filled with beautiful full color images and they teach you how to light both interiors and exteriors and daytime and nighttime scenes Learn how to save time without sacrificing the quality of your final renders with tips and tricks on rendering with Vray the most accurate rendering application for 3ds Max The downloadable resources include all the project files that you need to recreate each of the projects presented within the book Please note that this book does not support the current versions of 3ds Max and V Ray Topics include *Journal of the Society of Architects* ,1930 **American Gas-light Journal and Chemical Repertory** ,1918 [Journal of Proceedings of the Royal Institute of British Architects](#) ,1883 [American Architect](#) ,1907
