## **Architects Of Annihilation:**

Architects of Annihilation Gotz Aly, Susanne Heim, 2015-09-24 Architects of Annihilation follows the activities of the demographers economists geographers and planners in the period between the disorderly excesses of the November 1938 pogrom and the fully effective operation of the gas chambers at Auschwitz in summer 1942 The authors both journalists and historians argue that this group of intellectuals often combining academic civil service and Party functions made an indispensable contribution to the planning and execution of the Final Solution More than that in the economic and demographic rationale of these experts the Final Solution was only one element in a far reaching programme of self sufficiency which privileged the German Aryan population

**Ostkrieg** Stephen G. Fritz, 2011-09-08 On June 22 1941 Germany launched the greatest land assault in history on the Soviet Union an attack that Adolf Hitler deemed crucial to ensure German economic and political survival As the key theater of the war for the Germans the eastern front consumed enormous levels of resources and accounted for 75 percent of all German casualties Despite the significance of this campaign to Germany and to the war as a whole few English language publications of the last thirty five years have addressed these pivotal events In *Ostkrieg* Hitler's War of Extermination in the East Stephen G Fritz bridges the gap in scholarship by incorporating historical research from the last several decades into an accessible comprehensive and coherent narrative His analysis of the Russo German War from a German perspective covers all aspects of the eastern front demonstrating the interrelation of military events economic policy resource exploitation and racial policy that first motivated the invasion This in depth account challenges accepted notions about World War II and promotes greater understanding of a topic that has been neglected by historians

*Terrible Fate* Benjamin Lieberman, 2013-12-16 In the modern Greek city of Thessaloniki the ruins of a vast Jewish cemetery lie buried under the city's university Nearby is the site of the childhood home of one of the founders of the modern Turkish state These are tantalizing reminders of what was once the bustling cosmopolitan city of Salonica home not just to Greeks but to thousands of Sephardic Jews Turks Bulgarians and Armenians living and working peacefully alongside one another Thessaloniki is just one example among many of what used to be Over the past two centuries ethnic cleansing has remade the map of Central and Eastern Europe and the Middle East transforming vast empires that embraced many ethnic groups into nearly homogenous nations Towns and cities from Germany to Turkey still show traces of the vanished and nearly forgotten ethnic and religious communities that once called these places home In *Terrible Fate* Benjamin Lieberman describes the violent transformations that occurred in Salonica and hundreds of other towns and cities as the Ottoman Russian Austro-Hungarian and German empires collapsed to be reborn as the modern nation states we know today His book is the first comprehensive history of this process that has involved the murder and forced migration of tens of millions of people Drawing upon eyewitness accounts contemporary journalism and diplomatic records Lieberman's story sweeps across the continent taking the reader from ethnic cleansing's earliest beginnings in Bulgaria

Greece and Russia in the nineteenth century through the rise of nationalism both world wars the Armenian genocide the Holocaust and the rise and fall of the Soviet empire up to the breakup of Yugoslavia in the 1990s Along the way he examines the decisive roles of political leaders not only monarchs and dictators but also those who were democratically elected as well as ordinary people who often required very little encouragement to rob and brutalize their neighbors or who were simply caught up in the tide of history

*Visualizing Atrocity* Valerie Hartouni, 2012-08-20 Taking Hannah Arendt's account of the 1961 trial of Nazi official Adolf Eichmann as its point of departure this book reassesses the myths that shape our understanding of the Nazi genocide as well as totalitarianism's broader features These myths are tied to the atrocity imagery that emerged with the liberation of the concentration camps and played an evidentiary role in the post war trials of perpetrators At the 1945 Nuremberg Tribunal particular practices of looking were first established and later institutionalized through Eichmann's trial in Jerusalem as part of the fabric of historical fact These ways of seeing have come to constitute a visual rhetoric that drives contemporary mythmaking about how we know genocide and what is permitted to count as such In contrast Arendt's claims about the banality of evil work to disrupt this visual rhetoric
