*Architectural Delineation* Ernest Burden,1971      **Architectural Delineation** Ernest E. Burden,1992 The classic guide to the use of the camera for laying out perspectives revised and updated to highlight the author's photographic techniques to introduce new computer techniques for accomplishing the same accurate layouts as with the camera and to present hundreds of recent examples of architectural renderings from leading professionals Annotation copyrighted by Book News Inc Portland OR      **Architectural Delineation** James Davis,James C. Watkins,2001 Architectural Delineation is a text realistically based on student examples which is appropriate for any art architecture class where hand drawing is emphasized It would be particularly useful for any student interested in majoring in architecture or interior design This text is a result of the authors never being completely satisfied with the various instructional books available over the 15 years they have taught architectural drawing Their goal is to provide exercises that increase visual awareness and develop drawing skills and confidence in each student who uses this book Each project in Architectural Delineation is designed to give the student cumulative information while reviewing previously acquired skills The authors feel that the discipline of seeing by way of drawing is an end in itself It makes the individual more intimately aware of the external world and the internal world of ideas The first two chapters of this text provide a presentation of the course of study developed at Texas Tech University for a two semester sequence in freehand drawing The first semester activities are limited to black and white media The second semester is focused on the use of color Chapter three is essentially a portfolio of professional work This section includes both black and white and full color examples of architectural illustration by significant architects designers and illustrators Chapter four is devoted to advance projects by upper level students      **Architectural Delineation** Ivo D. Drpic,1993      *Delineation* Gary Tobey,Nels Hildeton,1992      **Architectural Delineation** ,1984      **Architectural Delineation** Alfred M. Kemper,1974\*      Vervm Fictvm Brian Delford Andrews,2021-04-12 The drawing has always been our most essential method of communication Drawings have offered us both a glimpse into the past and a view to the future As a vehicle of transferring ideas it is without equal As the computer gains ground in our society the drawing and the ability to execute it are diminishing Many architectural educators continue to extol the virtues of the drawing and the sketch however students seem to not comprehend the value and the didactic nature of this fundamental act The availability of paper during the Renaissance ushered in a power recognition and acceptability of the drawing Suddenly an architect or artist could sketch an idea and the concept could be communicated to others far afield This phenomenon has remained unchanged for hundreds of years It lingers today however it increasingly is seldomly used Sketches today are seen more as trophies of the past Designers often create the sketches after the design is finished as a nod to the past and as proof of their all too false process Over the last thirty five years Andrews has discovered some interesting and disturbing things about the act of drawing One should understand the nuances of the both the process and the product It is a tremendously time consuming action that

offers no easy answers One should both comprehend and value the end product One should take possession of the project through the medium of the drawing and know it intimately by constructing it through that process There are times when the act is accompanied by a sensation that is almost audible This perception is brought on only by this particular type of toil The drawing must become part of you
