Paradise Planned Robert A.M. Stern, David Fishman, Jacob Tilove, 2013-12-03 Paradise Planned is the definitive history of the development of the garden suburb a phenomenon that originated in England in the late eighteenth century was quickly adopted in the United State and northern Europe and gradually proliferated throughout the world These bucolic settings offered an ideal lifestyle typically outside the city but accessible by streetcar train and automobile Today the principles of the garden city movement are once again in play as retrofitting the suburbs has become a central issue in planning Strategies are emerging that reflect the goals of garden suburbs in creating metropolitan communities that embrace both the intensity of the city and the tranquility of nature Paradise Planned is the comprehensive encyclopedic record of this movement a vital contribution to architectural and planning history and an essential recourse for guiding the repair of the American townscape

New Silk Road Michele Bonino, Francesco Carota, with Sohrab Ahmed Marri, 2025-01-27 China s Belt and Road Initiative started in 2013 has transformed many places around the world but also China itself In some cases it provided crucial infrastructure such as the General Hospital of Niger in Niamey or the National Library of El Salvador while it also generated entire new urban areas e g the Free Zone in Khorghos Kazakhstan with sometimes controversial effects to local communities and the environment Based on research undertaken at the Politecnico di Torino this publication looks at the Belt and Road Initiative in architectural and spatial terms Organized in thematic categories it entails a survey of 21 case studies and investigates the impact of these China backed projects All buildings are documented with maps architectural drawings and photographs specifically created for this book A critical appraisal and an architectural guide to the Belt and Road Initiative Authors include Michele Bonino Francesca Governa Politecnico di Torino Francesco Carota University of Kansas Sohrab Marri Balochistan University Charlie Xue City University of Hong Kong With photo reportages by Ivo Tavares Paulo Moreira and Al Yousuf *Bibliographic Guide to Art and Architecture* New York Public Library. Sacred Buildings Rudolf Stegers, 2008-05-16 The building of religious structures represents a rare opportunity for the architect to concentrate on the creation of volume space and form Sacred architecture is far less determined than other building tasks by functional requirements norms and standards As a rule it is free to unfold as pure architecture Thus in design terms this building task offers enormous freedoms to the architect At the same time however the special atmospherics of sacred spaces call on the part of the architect for a highly sensitive treatment of religion and the relevant cultural and architectural traditions In a systematic section this volume introduces the design technical and planning fundamentals of building churches synagogues and mosques In its project section it also presents about seventy realized structures from the last three decades Drawing upon his in depth knowledge of the subject and his many years of publishing experience the author offers a valuable analysis of the conceptual and formal aspects that combine to create the religious impact of spaces e g the ground plan the shapes of the spaces the incidence of light and materiality **Architectural Publications Index**
