The Structural Basis of Architecture Bjørn N. Sandaker, Arne P. Eggen, Mark R. Cruvellier, 2019-03-25 This is a book that shows how to see structures as being integral to architecture It engages a subject that is both about understanding the mechanical aspects of structure as well as being able to relate this to the space form and conceptual design ideas that are inherent to the art of building Analyzing the structural principles behind many of the best known works of architecture from past and present alike this book places the subject within a contemporary context The subject matter is approached in a qualitative and discursive manner illustrated by many photographs and structural behavior diagrams Accessible mathematical equations and worked out examples are also included so as to deepen a fundamental understanding of the topic This new color edition s format has been thoroughly revised and its content updated and expanded throughout It is perfect as either an introductory structures course text or as a designer s sourcebook for inspiration for here two essential questions are addressed in parallel fashion How do structures work and What form do structures take in the context of architecture and why so A rich varied and engaging rationale for structural form in architecture thus emerges

Architectures of Occupation in the Australian Short Story Patrick West, 2024-05-28 Patrick West s *Architectures of Occupation in the Australian Short Story* cultivates the potential for literary representations of architectural space to contribute to the development of a contemporary politics of Australian post colonialism West argues that the predominance of tropes of place within cultural and critical expressions of Australian post colonialism should be re balanced through

attention to spatial strategies of anti colonial power To elaborate the raw material of such strategies West develops interdisciplinary close readings of keynote stories within three female authored pan twentieth century Australian short story collections *Bush Studies* by Barbara Baynton 1902 *Kiss on the Lips and Other Stories* by Katharine Susannah Prichard 1932 and *White Turtle A Collection of Short Stories* by Merlinda Bobis 1999 The capacity of the short story form to prompt creative and politically germinal engagements with species of space associated with architecture and buildings is underscored Relatedly West argues that the recent resurgence of binary thought on local national and international scales occasions an approach to the short story collections shaped by binary relationships like a dichotomy of inside and outside Concluding his argument West connects the literary and architectural critiques of the story collections to the wicked problem linked to ongoing colonial violences of improving Australian Indigenous housing outcomes Innovative and interdisciplinary this book will be of interest to scholars and students of Literary Architectural and Postcolonial Studies

Architecture Beyond the Cupola Alberto Pugnale, Alberto Bologna, 2023-05-24 This book reviews Dante Bini's inventions and designs focusing on his form resistant Binishell and other pneumatic construction systems Dante Bini's double profile of architect and builder underpins the narrative of the entire book It is used to analyse the evolution of the early reinforced concrete Binishell patent into a variety of automated construction systems based on the use of air Dante Bini has always been quite proactive in promoting his work and disseminating the results of his experimentations and achievements via journal

articles conference presentations and public talks promotional brochures in multiple languages were also prepared to export and license his patents in various countries from Italy to the Americas and Australia Despite this a rigorous study of Dante Bini s work is still unavailable and the relevance of this figure to contemporary architecture has yet to be discussed comprehensively This book fills in this gap and arrives at the right time during the last two decades there has been an exponential interest in shell and spatial structures particularly concerning the use of complex geometries and innovative construction techniques This book will be of interest to academics in architectural design theory and construction history and practitioners and students interested in expanding their knowledge in the design and construction of shell and spatial structures
