Architecture in Abjection Zuzana Kovar, 2017-11-30 This book marks a turning point in architectural theory by using philosophy to examine the field anew Breaking from the traditional dualism within

architecture which presents the body as subject and space as object it examines how such rigid boundaries can be softened Zuzana Kovar thus engages with complementary and complex ideas from architecture philosophy feminist theory and other subjects demonstrating how both bodies and bodily functions relate deeply to architecture Extending philosopher Julia Kristeva s notion of abjection the confrontation of one s own corporeality as something is excreted Kovar finds parallels in the concept of the scaffold Much like living bodies and their products can impact on the buildings that house them old skin cells create dust menstrual blood stains our breath heats and cools surfaces scaffolding is similarly ephemeral and yet not entirely separable from the architecture it supports Kovar shifts the conversation about abjection towards a more nuanced idea of architecture where living organisms building matter space decay and waste are all considered as part of a continual process drawing on the key informing works of thinkers like Gilles Deleuze and Felix Guattari to do this Including a number of experimental projects conducted in the spaces inhabited by the author herself to illuminate the theory at its core the book forms a distinguished and pioneering study designed for practitioners and scholars of architecture philosophy and visual culture alike
