Areal Diffusion And Genetic Inheritance Problems In Comparative Linguistics:

Areal Diffusion and Genetic Inheritance Aleksandra I[]U[]r'evna Aikhenval'd, Alexandra Y. Aikhenvald, Robert M. W. Dixon, 2006 Two languages can resemble each other in the categories constructions and types of meaning they use and in the forms they employ to express these Such resemblances may be the consequence of universal characteristics of language of chance or coincidence of the borrowing by one language of another s words or of the diffusion of grammatical phonetic and phonological characteristics that takes place when languages come into contact Languages sometimes show likeness because they have borrowed not from each other but from a third language Languages that come from the same ancestor may have similar grammatical categories and meanings expressed by similar forms such languages are said to be genetically affiliated This book considers how and why forms and meanings of different languages at different times may resemble one another Its editors and authors aim a to explain and identify the relationship between areal diffusion and the genetic development of languages and b to discover the means of distinguishing what may cause one language to share the characteristics of another The introduction outlines the issues that underlie these aims introduces the chapters which follow and comments on recurrent conclusions by the contributors The problems are formidable and the pitfalls numerous for example several of the authors draw attention to the inadequacy of the family tree diagram as the main metaphor for language relationship The authors range over Ancient Anatolia Modern Anatolia Australia Amazonia Oceania Southeast and East Asia and Sub Saharan Africa The book includes an archaeologist s view on what material evidence offers to explain cultural and linguistic change and a general discussion of which kinds of linguistic feature can and cannot be borrowed The chapters are accessibly written and illustrated by twenty maps The book will interest all students of the causes and consequences of language change and evolution

and externally motivated causes of language change Dynamics of Contact-Induced Language Change Claudine Chamoreau, Isabelle L glise, 2012-04-26 Open publication The volume deals with previously undescribed morphosyntactic variations and changes appearing in settings involving language contact Contact induced changes are defined as dynamic and multiple involving internal change as well as historical and sociolinguistic factors A variety of explanations are identified and their relationships are analyzed Only a multifaceted methodology enables this fine grained approach to contact induced change A range of methodologies are proposed but the chapters generally have their roots in a typological perspective The contributors recognize the precautionary principle for example they emphasize the difficulty of studying languages that have not been described adequately and for which diachronic data are not extensive or reliable Three main perspectives on contact induced language change are presented The first explores the role of multilingual speakers in contact induced language change especially their spontaneous innovations in discourse The second explores the differences between ordinary contact induced change and change in endangered languages The third discusses various aspects of the relationship between contact induced change and internal change **Grammars in Contact** Alexandra Y. Aikhenvald, R. M. W. Dixon, 2007-01-04 Languages can be similar in many ways they can resemble each other in categories constructions and meanings and in the actual forms used to express these A shared feature may be based on common genetic origin or result from geographic proximity and borrowing Some aspects of grammar are spread more readily than others The question is which are they When languages are in contact with each other what changes do we expect to occur in their grammatical structures Only an inductively based cross linguistic examination can provide an answer This is what this volume is about The book starts with a typological introduction outlining principles of contact induced change and factors which facilitate diffusion of linguistic traits It is followed by twelve studies of contact induced changes in languages from Amazonia East and West Africa Australia East Timor and the Sinitic domain Set alongside these are studies of Pennsylvania German spoken by Mennonites in Canada in contact with English Basque in contact with Romance languages in Spain and France and language contact in the Balkans All the studies are based on intensive fieldwork and each cast in terms of the typological parameters set out in the introduction The book includes a glossary to facilitate its use by graduates and advanced undergraduates in linguistics and in disciplines such as anthropology **Concise Encyclopedia of Languages of the World** , 2010-04-06 Concise Encyclopedia of Languages of the World is an authoritative single volume reference resource comprehensively describing the major languages and language families of the world It will provide full descriptions of the phonology semantics morphology and syntax of the world s major languages giving insights into their structure history and development sounds meaning structure and language family thereby both highlighting their diversity for comparative study and contextualizing them according to their genetic relationships and regional distribution Based on the highly acclaimed and award winning Encyclopedia of Language and Linguistics this volume will provide an edited collection of almost 400 articles throughout which a
